📍 Riyadh - Saudi Arabia.

### ABOUT ME

"My career goal is to achieve success in the field of civil engineering through the development and implementation of advanced and sustainable engineering projects. I seek to improve my skills in design and supervision of construction works, and to contribute to providing effective solutions to engineering challenges. I aspire to apply modern concepts and modern technology in my field, with a focus on "Innovate and achieve the highest levels of quality and safety in projects. In addition, I aim to lead an integrated and effective work team, and direct projects towards commercial success and environmental sustainability. Through this goal, I seek to achieve continuous development in my professional and personal path."

### EDUCATION

- Bachelor of Civil Engineering from Al Salam Higher Institute of Engineering and Technology, general grade – good (2017)
- Graduation project - design and implementation of reinforced concrete structures and buildings. (excellent)

### WORK EXPERIENCE

- Site engineer at Hussein Suwailem Al-Harbi contracting Establishment from (4/2025) till Now.
- Project Manager at Ghama Construction Company, from (12/2023) to (12/2024).
- Site engineer at Al-Radwan General Contracting Company from (2/2022) to (7/2023).
- Site engineer at Sama Masr General Contracting Company from (8/2017) to (12/2018). Then from (5/2019) to (12/2021).

### FUNCTIONAL TASKS

- Analyze the technical needs of the project.
- Preparing engineering designs using engineering computing programs.
- Ensuring that designs comply with local and international engineering regulations and standards.
- Monitor and manage construction operations to ensure implementation according to designs.
- Coordinate with workers and contractors to ensure quality work and compliance with schedules.
- Planning and organizing the project stages.
- Preparing budgets and monitoring costs.
- Problem solving and risk control.
- Applying the latest technologies and software in the field of engineering design and analysis.
- Conducting periodic inspection to ensure that works comply with specifications and standards.
- Analyze the results and take necessary actions to correct defects.

### PERSONAL SKILLS

- The ability to pay attention to all the details
- Enjoy extreme flexibility in dealing with others
- Act as a leader and take responsibility
- The ability to accept trends
- Communication skills with others

### COMPUTER SKILLS

- Microsoft Office programs (Excel, Word, PowerPoint).
- Proficiency in dealing with SAP and SAIF programs.
- Proficiency in dealing with AutoCAD programs.
- Proficiency in using the ITAP program.

### LANGUAGES

- Arabic: mother tongue
- English: very good
