

RESUME

[1] Ashfaq Ahmad

[1.1] POSITION

HSE Engineer

[1.2] INTRODUCTION

An experienced and certified HSE professional with 18 years of experience with international organizations in the construction (buildings, roads and airports), power sub-station/electrical grid, oil & gas industries. I hold Masters in Occupational Health & Safety, OTHM Level-6 in progress, NEBOSH IGC, IOSH MS, OSHA 30hours, Train the Trainers Certificate, Assess the Candidates Skills & Knowledge Certificate, Diploma in HSE Engineering, HAZARD Communication for Consultants, QHSE Internal Auditor (ISO 45001, ISO 14001, ISO 9001). Strong interpersonal skills and communication skills, and a particular talent for forward planning to develop effective and cost-efficient HSE solutions in compliance with HSE regulations, standards, and practices, fire protection and prevention system, clients and contractors attended HSE meetings, seminars, and courses. Manage and maintain HSE documentation, including policies, procedures, risk assessments align with MS, and record keeping. HSE data management such as incident reports, training records, and audit findings. Coordinate communication between HSE Team management and other stakeholders., HSE Training management, Occupational Health and Safety Management System, Environmental Management System, and Hazard and Risk Management System were all successfully implemented. Oversee any accidents, incidents, or Control of Substances Hazardous to Health (COSHH); maintained contract-specific HSE and quality documentation, including procedures, work instructions, and audit schedules; performed internal audits; and made sure waste segregation is done as per local and international regulations. Monitored hazardous operations and took necessary safety precautions as required. Initiated, lead and assisted risk assessments related to commissioning and start up activities. Identified, quality check, directed and follow up on risk analyses performed by contractors, vendors for the daily work. Identified and reported violations of HSE rules to the program management.

[1.3] PROFESSIONAL EXPERIENCE

[1.3.1] HSE Engineer (06/2024 to date)

EMPLOYER: CRCC China Railway Construction Corporation, KSA

PROJECT: Jeddah Stadium and Surrounding Villages Project.

LOCATION: Jeddah

CLIENT: JCDC Jeddah Central Development Co. Saudi Arabia

BRIEF:

- Performing compliance reviews, risk assessments, and other HSE assessments to support the organization's integrated management system.
- Developing and implementing an emergency response plan.
- Identifying opportunities to remove hazards from the workplace and establish programs and processes to mitigate all workplace hazards.
- Delivering and coordinating health and safety training for employees.
- Educating on workplace regulations, policies, and procedures.
- Conducting job safety analysis and personal protective equipment analysis to identify hazards for elimination and select proper safety equipment to protect employees from hazards.
- Industrializing and implementing safety awareness communications between workers and management to increase hazard awareness.
- Determining the nature of code violations and issued written notices of violations.

RESUME

- Direct post-accident investigations and prepared reports to identify possible accident causes and hazards.
- Managing the full life cycle of assigned audits in alignment with departmental procedures, delivering progress as well as closing reports to senior management and clients.
- Consulting with clients on best practices and served as manager for all process improvements and regulatory initiatives, verified consistency in quality planning, quality control, quality insurance, and quality improvement.
- Structuring programs, producing working documentation, and implementing best practices.
- Settling recommendations to reduce hazards by improving behaviors and procedures and implementing immediate strategies to resolve deficiencies.
- Built successful hygiene programs based on techniques such as atmospheric monitoring and noise surveys to provide ongoing worker support.
- Eliminate dangerous behaviors potentially impacting workers' safety.
- Working within applicable standards, policies, and regulatory guidelines to promote a safe working environment.
- Designing safety protocol drills for fires, accidents, oil or chemical spills, and other emergency situations, draught guidelines for hazard control programs such as fall protection, electrical safety, and air quality guidelines.

[1.3.2] HSE Manager (10/2017 to 08/2022)

EMPLOYER: MAR Construction for TAV Construction

PROJECT: Modernization of Bahrain International Airport Project.

LOCATION: Bahrain

CLIENT: Ministry of Transportation, Bahrain Airport Company

BRIEF:

- Provided professional health, safety, and environmental support to all aspects of the project operations and to support the implementation of the HSE policies.
- Produced and revised the SOPs (standard operating procedures), operational instructions, and HSE plans; and supported development.
- Conducted HSE training, checked compliance on the project, Managed subcontractors, HSE's overall project supervision
- Developed and implemented a QHSE plan, conducted HSE audit, inspected the site, and determined overall compliance with international HSE standards.
- Implemented fire safety codes on site, prepared an EIA of the project activities.
- The scaffolding tag system implemented, ensuring overall supervision of all critical works.
- Provided professional health, safety, and environmental support to all aspects of the whole project and to support the implementation of the HSE policies and the company's fulfillment of its duty of care responsibilities by promoting a pro-active HSE culture and actively monitoring HSE aspects of all processes and documentation.
- Assisted in production and revision of standard operating procedures, operational instructions, and HSE plans.
- Assisted management to implement HSE plans according to international and national HSE standards.
- Supported development while maintaining, reviewing, and coordinating HSE activities.
- Managed HSE training plan and carried out or supported presentations.
- Conducted HSE training like permit to work, fire emergency/firefighting, H2S awareness and escape, confined space entry, hands and finger safety, working at height, use of a Harness and fall protection devices.
- Developed specific ERP and, most important, risk assessments.
- Lead the investigation of any accidents or incidents.

RESUME

- Maintained contract specific HSE documentation, including procedures, work instructions, and audit schedules.
- Performed internal audits.
- Managed improvement actions, corrective actions, and NCRs to satisfactory closeout.
- Supported company and contractors in maintaining compliance with the clients' HSE plans, procedures, and standards.
- Advised, monitored, and audited HSE arrangements.
- Ensured that the waste management system was in place in accordance with local and international regulations.
