 Saudi Arabia

OBJECTIVE

Architectural Engineer with a solid academic background and growing practical experience in design and site supervision and coordination. Skilled in monitoring construction activities, collaborating with multidisciplinary teams, and ensuring work quality according to project standards. Eager to contribute technical and creative insights to achieve high-quality architectural outcomes while continuing to grow professionally.

EDUCATION

Prince Muqrin University, Medina

Bachelor of Science in Architectural Engineering | 2024

- Designing and developing architectural drawings and plans in compliance with standards.
- Collaborating with engineers, contractors, and stakeholders to ensure project success.
- Applying sustainable and green building practices in design implementation.
- Conducting site visits to monitor construction progress and quality control.
- Utilizing BIM and CAD tools to enhance design accuracy and project coordination.
- Preparing detailed reports, presentations, and technical documentation.

EXPERIENCE

Site Supervision & Operations (Current Role)

- Coordinated between multiple departments to ensure efficient workflow and adherence to safety and quality standards.
- Assisting in project scheduling, resource allocation, and progress tracking to support effective project management.
- Developed strong organizational and problem-solving skills through daily supervision and coordination activities.
- Preparing reports and documentation to support decision-making and improve coordination among stakeholders.
