- **Iqama:** Valid & Transferable

## PROFESSIONAL SUMMARY

---

Results-oriented **Planning Engineer** with **7+ years of experience** in construction and project controls across Saudi Arabia and Pakistan. Skilled in **Primavera P6, Critical Path Analysis (CPA), Earned Value Management (EVM), and delay analysis**, with a proven ability to deliver housing, infrastructure, and commercial projects in compliance with client requirements and industry standards. Experienced in developing and updating baseline schedules, preparing short- and long-term work plans, and coordinating with multidisciplinary teams to ensure timely delivery. Adept at preparing **progress dashboards, KPIs**, while supporting project control processes and resource planning.

## EDUCATION

---

- BS Civil Engineering

## CERTIFICATIONS / COURSES

---

- Registered with Pakistan Engineering Council.
- Survey Camp Certificate

## KEY SKILLS

---

- Project Planning & Scheduling (Primavera P6)
- Baseline & Recovery Schedule Development
- Critical Path Analysis (CPA) & Delay Analysis
- Earned Value Management (EVM) & KPI Tracking
- Short-Term & Long-Term Work Plans
- Resource & Manpower Planning (S-Curves, Histograms)
- Risk Identification & Mitigation Strategies
- Baseline Updates & Change Management
- Progress Reporting (Weekly/Monthly Reports, Dashboards)
- Stakeholder & Contractor Coordination

## PROFESSIONAL EXPERIENCE (7+ Years)

---

### ✚ Khonaini International Company

**Designation:** Planning Engineer

**Project:** TB Marina Village, Secondary Infrastructure Work Amaala

**Client:** Red Sea Global, Amaala

**Duration:** April 2023 – June 2025

#### ROLES & RESPONSIBILITIES

---

- Conducted **project planning and scheduling activities** across all phases.
- Conducted detailed **delay analysis** in compliance with client requirements.

- Led preparation of **resource-loaded baseline schedules, manpower histograms, and cash flow forecasts**.
- Presented **weekly/monthly progress dashboards and reports** to senior management and client.
- Coordinated with **Engineering, Procurement, and Cost Control** to optimize schedule performance.
- Provided **recovery and mitigation strategies** to project managers and stakeholders.

### ✚ ABR Contracting Company, Riyadh, KSA

**Designation:** Planning Engineer

**Project:** Construction of Residential Villas under the Sakani Housing Program – Riyadh

**Client:** Ministry of Housing (KSA)

**Duration:** February 2021 – March 2023

#### ROLES & RESPONSIBILITIES

---

- Developed and maintained **baseline and recovery schedules** in Primavera P6.
- Conducted **Critical Path Analysis** and recommended **mitigation strategies** for delays.
- Prepared **time impact studies** and contributed to **EOT claim documentation**.
- Tracked project progress using **EVM, KPIs, and performance metrics**.
- Generated **dashboards, histograms, and S-curves** for management and client reporting.
- Coordinated with **procurement, engineering, and construction teams** to ensure accurate scheduling.
- Participated in **progress review meetings**, advising on corrective actions and recovery plans.

✚ **Permasteelisa Gartner Saudi Arabia**, Riyadh, KSA

**Designation:** Planning Engineer

**Project:** King Abdullah Financial Project (KAFF)

**Client:** Al Ra'idah Investment Company

**Duration:** July 2018 – December 2020

### ROLES & RESPONSIBILITIES

---

- Assisted senior planners in **developing and updating project schedules** using Primavera P6.
- Prepared **weekly and monthly progress reports** for management and client review.
- Coordinated with site teams to gather **schedule updates and progress data**.
- Conducted **basic Critical Path Analysis (CPA)** and identified activities impacting project delivery.
- Supported preparation of **short-term work plans** and resource forecasts.
- Assisted in the initial stages of **delay analysis**.

✚ **Khyber Star Construction Company**, KP, Pakistan

**Designation:** Junior Planning Engineer

**Project:** Construction of University Town Committee Plaza-II, Peshawar

**Client:** Tehsil Municipal Authority, Government of Khyber Pukhtunkhwa, Pakistan

**Duration:** November 2015 – June 2018

### ROLES & RESPONSIBILITIES

---

- Assisted in preparing and updating **project schedules** under the guidance of senior planners.
- Coordinated with site engineers to gather **daily/weekly progress data** for schedule updates.
- Developed **short-term work plans** and monitored activity progress against milestones.
- Supported the preparation of **weekly progress reports** for internal management.
- Gained initial exposure to **Primavera P6**, learning schedule development and progress tracking.
- Assisted in conducting **basic Critical Path Analysis (CPA)** to identify potential delays.
- Supported the preparation of **resource histograms and manpower planning charts**.
- Collaborated with site teams to ensure schedule alignment with **construction progress**.

**Trainee Engineer**, May 2015-September 2015

## **ROLES & RESPONSIBILITIES**

---

- Assisted senior engineers in surveying and **inspecting water supply schemes**, including tube wells, distribution networks, and overhead water tanks.
- Gained practical exposure to **pump house installations, pipeline layouts, and valve chambers**.
- Supported **preparation of BOQ quantities, estimates, and technical reports** for water supply projects.
- Monitored ongoing **drilling, pipe laying, and testing activities** under supervision.
- Assisted in **reviewing design drawings and specifications** related to water supply and sanitation systems.
- Prepared **daily site reports on construction progress and material usage**.
- Learned **fundamentals of public health engineering standards** and government procedures for water-related infrastructure.

## **PERSONAL SKILLS**

---

- Disciplined and results-driven
- Self-reliant with excellent communication skills
- Strong teamwork and leadership abilities
- Effective management and coordination skills
