PUBLIC HEALTH

Motivated and results-driven Infection Control Specialist with a background in Environmental Health and Quality Management, seeking a challenging role in infection control. Bringing over two years of experience in infection control in healthcare settings, coupled with expertise in implementing health protocols, ensuring compliance, and promoting a safe environment. I am dedicated to leveraging my knowledge to drive effective infection prevention strategies, enhance patient safety, and collaborate with healthcare teams to deliver successful outcomes.

PROFESSIONAL EXPERIENCE

infection control specialist

Jun 2022 - present

Oversaw infection surveillance, implemented prevention protocols, and trained staff on hygiene standards to minimize infection risks. Conducted data analysis for infection trends, reported findings, and collaborated with healthcare teams to maintain compliance and enhance safety across the clinic.

Quality control supervisor

Sep 2024 - Nov 2024

Managed quality assurance processes, monitored compliance with health and safety standards, and conducted regular audits to ensure operational excellence. Developed corrective actions, trained staff on quality protocols, and collaborated with teams to improve service quality and maintain regulatory compliance.
