Role and Responsibility

2. Quality Assurance & Documentation:

- Responsible for QA/QC documents of the complete project including equipment's calibration, test results, **WIR**, **MIR**, Non-Conformance reports (**NCR**), site observations (**SOR**), Method Statements (**MS**), Inspection & test plan (**ITP**) all other relevant documents and reports in compliance with project specifications.
- Preparation & review of Method Statements (**MOS**), Inspection and Test Plans.
- Review the Shop drawings and marked up drawings during final approval of As-Built drawings.
- Collaborate with project managers and engineers to address quality issues and implement corrective actions.
- Develop and update quality control plans, procedures, and documentation.
- Carefully examine technical data sheets for materials before raising any inspection.
- Raise Material Inspection request (**MIR**) to the engineer for approval before proceeding with specific tasks.
- Raise work Inspection request (**WIR**) to consultant engineer for approval before proceeding with specific tasks.
- Conduct daily, weekly, and final inspections of all construction activities including Civil, Structural, Architectural (CSA), Mechanical, Electrical, and Plumbing (MEP) works.
- Verify that materials, installation methods, and workmanship comply with approved project plans, specifications, ITPs (Inspection and Test Plans), and relevant codes.
- Prepare and issue detailed Inspection Requests (IRs) and hold/witness inspections with the Client/Contractor representatives.
- Identify, document, and track Non-Conformance Reports (NCRs), ensuring prompt and effective corrective and preventative actions are implemented.
- Maintain accurate, complete, and auditable records of all quality control documentation, including test results, inspection reports, and certifications.
- Collaborate with the construction, engineering, and project management teams to uphold a high standard of quality and safety on site.
- Maintain detailed records of inspections, approvals, and QA/QC documentation.
- Conduct site inspections and audits to verify compliance with approved drawings and specifications

•2 Site Inspection & Monitoring:

- Conduct routine inspections of softscape (planting, turf, soil) and hardscape (paving, walls, furniture) works.
- Verify materials and workmanship at site against approved specifications and drawings.
- Check installation of irrigation systems, drainage, lighting, and edge restraints.

• 3. Health, Safety & Environmental (HSE) Compliance:

Ensure landscaping activities adhere to safety regulations and environmental requirements.

- Support sustainability goals such as use of native plants, water-saving irrigation, and soil protection.

• 4. Testing and Validation:

- Supervise or coordinate soil testing, compaction tests, irrigation pressure testing, and other field/lab tests related to landscaping.
- Verify plant health root ball sizes upon delivery note.
