Professional Summary

Results-driven Maintenance Engineer with over 10 years of experience in maintenance, operations, and technical management within the heavy equipment and industrial sectors. Holds a bachelor's degree in mechanical engineering with additional professional certifications. Proven ability to lead large-scale maintenance operations, optimize workshop performance, and minimize downtime through effective preventive and corrective strategies. Skilled in team supervision, inventory control, and cost optimization while maintaining the highest safety and quality standards. Committed to continuous improvement, with hands-on experience in crusher maintenance, production processes, and modern maintenance practices.

Professional strengths include:

- Extensive experience in workshop management, overseeing daily maintenance operations and technical planning.
- Strong background in spare parts preparation and inventory management to ensure availability and minimize downtime.
- Proven ability to develop and implement preventive and corrective maintenance plans to enhance equipment performance.
- Hands-on experience in diesel engine maintenance, crushers, and heavy equipment servicing.
- Skilled in using diagnostic tools and fault detection systems for accurate troubleshooting.
- Expertise in fleet performance analysis, optimizing productivity, and reducing operational and maintenance costs.
- Excellent leadership and team management skills, with a focus on task delegation, performance monitoring, and quality control.
- Committed to occupational safety, health standards, and environmental protection within the workshop.
- Competent in emergency response and fire safety procedures.
- Experience in engineering sales and supplier/customer relationship management to ensure service quality and client satisfaction.
- Proficient in MS Office applications for technical reporting, maintenance scheduling, and performance tracking.
- Skilled in SolidWorks and AutoCAD for technical design and equipment layout planning.
- Strong negotiation, communication, and relationship-building abilities across all organizational levels.

- Focused on enhancing operational efficiency, reducing costs, and maximizing productivity in workshop environments.

Experience

Abdul Mohsen Altamimi Contracting - Jeddah, Saudi Arabia

Workshop Manager – Qiddiya Project

09/2023 - Present

- **Full management of the main workshop for the Qiddiya project in Jeddah, overseeing an extensive fleet of over 400 trucks and heavy equipment, operating in two shifts (12 hours each).**
- **Responsible for developing and implementing preventive and corrective maintenance plans, estimating costs, and maintaining detailed maintenance records to ensure optimal equipment performance.**
- **Supervising a wide range of equipment, including:**
 - Oversee all operations of the **main workshop**, managing a diverse fleet of trucks, heavy machinery, and support equipment across multiple shifts.
 - Develop and implement **preventive and corrective maintenance plans** to ensure high equipment availability and reliability.
 - Supervise maintenance activities for 400 Plus equipment, including:
 - **Trucks and transport vehicles** (SinoTruk, Renault)
 - **Earthmoving machinery** (Caterpillar bulldozers, wheel loaders, and graders)
 - **Excavators** (Caterpillar and Komatsu models)
 - **Support equipment** (backhoe loaders, Bobcat, compactors)
 - **Power units** (generators from Perkins, Caterpillar, and other brands)
 - **Other vehicles and equipment** (pickups, buses, tower lights)
 - Manage all **workshop operations**, including fault diagnostics, repairs, and equipment readiness for on-site and off-site deployment.
 - Coordinate with maintenance teams and operators to achieve **minimal downtime** and ensure smooth operational continuity.
 - Prepare **regular technical reports** for management, covering equipment performance, failure analysis, and maintenance improvement recommendations.
 - Ensure full compliance with **HSE standards**, developing method statements and risk assessments for safe workshop operations and equipment handling.
 - Skilled in **CAT ET diagnostics** for Caterpillar machinery and **diagnostic tools for SinoTruk trucks**, enabling accurate troubleshooting and efficient fault resolution.

Rhino United Company Limited - Jeddah, Saudi Arabia
Maintenance Engineer

06/2021– 09/2023

- Planning and carrying out scheduled maintenance.
- Repairing equipment and testing repairs.
- Supervising contractors, and engineering and technical staff.
- Responding to emergencies.
- Diagnosing faults.
- Managing stocks of supplies and equipment.
- Keeping records of faults and repairs.

AutoBus - Amman, Jordan
Mechanical Supervisor

03/2015 – 10/2016 (Part Time)

- Managed preventive and corrective maintenance to reduce downtime.
- Ensured safety and environmental compliance in all operations.
- Led and coordinated technicians and workshop staff.
- Maintained inventory, spare parts, and documentation.
- Attended industry conferences to enhance skills and knowledge.

ADRITEC- Amman, Jordan
Production Technician

03/2015 – 10/2016

- Operate machinery and production lines following **SOPs**.
- Monitor **product quality** and adjust machine settings as needed.
- Perform **basic preventive maintenance** and report technical issues.
- Record production data and collaborate with teams to **improve efficiency**.
- Follow **safety procedures** and maintain a clean, organized workspace (**5S**).
- Participate in **process improvement initiatives** (Kaizen / Lean).

Awda Al-Salaita Center- Amman, Jordan
Mechanical Technician

09/2012 – 07/2013 (Part Time)

- Diagnose engine and transmission problems.
- Perform maintenance services and repairs.
- Replace or repair faulty parts and components.
- Use diagnostic tools and equipment.
- Keep records of repairs and maintenance performed.
- Follow safety and environmental regulations

Samer Rashid Garage- Amman, Jordan
Mechanical Technician

09/2010 – 09/2012 (Part Time)

- Diagnose engine and transmission problems.
- Perform maintenance services and repairs.
- Replace or repair faulty parts and components.
- Use diagnostic tools and equipment.
- Keep records of repairs and maintenance performed.
- Follow safety and environmental regulations

Education

- **Bachelor's degree in mechanical engineering**

Al Hussein Bin Talal University"- Ma'an, Jordan

06/2021

- **Diploma Autotronics**

Al-Balqa Applied University – Alzarqa, Jordan

09/2017

- **Auto Mechanic**

Wadi Seer Training Center-Vocational Section (UNRWA)– Alzarqa, Jordan

09/2013

Certifications & Licenses

Saudi Council of Engineers – Mechanical Engineer (ID-833672)

Jordan Engineers Association- Mechanical Engineer (ID- 335578)

Shell Technology Leadership Conference 2025 – Dubai

Crane Appointed Preson - Testing Equipment Specialist Team Co.

Personal Branding – Jordan EDRAAK

Autodesk Revit MEP workshop – Jordan Autodesk

SolidWorks – Jordan Engineers Association (JEA)

Life skills – Jordan Wadi Seer Training Center
