Summary

Civil Engineer with more than 13 years of experience in Saudi Arabia's commercial and governmental projects like the Royal Commission, Universities, Hospitals, and Residential projects. During my career I have developed my skills in different positions from technical departments to project and management departments; this fact gives me an extensive knowledge of different subjects that provides me with a wide vision of the whole picture which I can use in a new position in a progressive organization in the field of Civil engineering to use my education and my skills for organizational and personal growth.
