

Haider Aftab

39 Buffery Road, Dudley, United Kingdom

07455 318869 | hitachiteb@yahoo.com

Professional Profile

A highly driven Graduate Site Engineer at Galliford Try, currently leading three major work packages on a UK government infrastructure project. My role spans site engineering, utility coordination, and structural quality assurance, combining technical delivery with sub-agent-level coordination and stakeholder engagement. Recently achieved the APM Project Fundamentals Qualification (PFQ) and gained Associate Membership of the Association for Project Management, with plans to progress to charterhip.

I am actively developing my understanding of NEC4 contracts, particularly early warnings, risk registers, and compensation events, to align with consultancy best practice. With a strong technical foundation, hands-on delivery experience, and proven leadership beyond engineering, I am now seeking to transition into consultancy as an Assistant Project Manager, where I can apply my site background while developing client-facing and governance skills.

Key Skills

- Project work package delivery & coordination
- Utility Service Coordination & stakeholder management
- Structural quality assurance & compliance
- NEC4 awareness (early warnings, risk register, CEs, programme)
- Programme planning & risk management
- AutoCAD, GPS surveying & technical drawings
- Leadership, team coordination & problem-solving
- Digital: content creation, brand building, social media (300k+ audience)

Professional Experience
