📄 Professional summary

Architect with over five years of experience in design development and site coordination, delivering high-quality solutions across residential, commercial, institutional, hospitality, and urban design projects. My work reflects a strong commitment to **sustainability**, heritage-sensitive conservation, and the integration of culturally rooted materials and methods. I have contributed to projects involving sustainable design strategies, vernacular material application, and the preservation of cultural heritage through context-aware planning.

As a Junior Architect at Saudi Arabian Trading & Construction Co. (SATCO), I played a key role in the NEOM FCO project, conducting site inspections, reviewing technical documentation—including as-built, shop, and IFC drawings—performing CRS evaluations, and coordinating with consultant teams to ensure compliance with design standards and client expectations. **In a prior role at Eman Al-Baraka Co. Ltd.**, I demonstrated strong design proficiency in AutoCAD, SketchUp, and Revit, along with advanced visualization skills using Lumion. **At Design Matrix**, I contributed to projects that fused traditional architectural principles with contemporary design strategies, focusing on cultural identity preservation, heritage site conservation, and the integration of vernacular materials such as mud, stone, and wood into modern frameworks. **Proficient in Revit, AutoCAD, Navisworks, SketchUp, and Lumion**

🧠 Skills

– Expert in AutoCAD, Revit, SketchUp, Lumion, | Skilled in architectural drafting, 3D modeling, and rendering | Familiar with sustainable design and eco-friendly material selection | Specialized in heritage-sensitive architecture and cultural conservation | Contributed to projects using vernacular materials and traditional techniques | Capable of producing high-quality visual presentations | Effective in resolving design and execution challenges collaboratively | Knowledgeable in urban design and hospitality documentation

📁 Professional Experience

ARCHITECT

Saudi Arabian Trading & Construction Co.- SATCO
Fco project Neom,

03/2024 – 09/2025
TABUK , NEOM NRC9

- Conducted detailed site inspections to monitor construction progress and verify compliance with approved architectural drawings, specifications, and regulatory standards.
- Produced high-accuracy technical documentation, including shop drawings, IFC sets, and as-built records, using AutoCAD and Revit.
- Reviewed Consultant Review Sheets (CRS) and delivered structured, compliance-driven responses to ensure alignment with project objectives.
- Coordinated with multidisciplinary teams—consultants, engineers, and draftsmen—to resolve design conflicts and maintain workflow efficiency.

- Facilitated cross-functional communication to support timely decision-making and seamless project execution.
- Verified material specifications and construction methodologies on-site to ensure consistency with approved documentation and quality benchmarks.
- Participated in technical coordination meetings and design reviews, contributing to constructability assessments and design optimization.
- Updated architectural drawings to reflect site conditions, consultant feedback, and client-directed changes.
- Ensured full compliance with local building codes, safety protocols, and statutory regulations throughout the project lifecycle.
- Maintained structured documentation of drawings, revisions, approvals, and correspondence to support traceability and project governance.
- Assisted in preparing progress reports and technical submissions for client and consultant review.
- Supported quality control processes by identifying discrepancies and proposing corrective actions.
- Contributed to the evaluation of contractor submittals and material samples for design compatibility.
- Participated in design coordination workshops to align architectural intent with structural, MEP, and landscape disciplines.
- Engaged in post-construction review to ensure design integrity and client satisfaction.

ARCHITECT

2021 - 03/2024 | Riyadh Saudi Arabia

Eman Al-baraka

Co.Ltd Prepared and updated architectural drawings (plans, sections, elevations) based on project specifications and site conditions.

- Produced shop, IFC, and as-built drawings using AutoCAD and Revit with precision and clarity.
- Coordinated with site teams to ensure accurate implementation and alignment with design intent.
- Reviewed Consultant Review Sheets (CRS) and provided structured, compliance-focused responses.
- Estimated material quantities and supported documentation for progress reports and procurement planning.
- Verified construction methods and materials against approved technical documentation.
- Participated in technical meetings and design coordination sessions with consultants and engineers.
- Contributed to drawing revisions and finalization of as-built documentation.
- Ensured adherence to local building codes, safety regulations, and project standards.
- Created 3D models and visualizations using SketchUp and Lumion for design presentations.
- Maintained organized records of drawings, revisions, correspondence, and approvals.

ARCHITECT

07/2021 - 2021 | Lahore pakistan

Design matrix Lahore

Collaborated with architects, engineers, and site teams to ensure cohesive execution of design intent across all project phases.

- Ensured architectural drawings complied with project specifications, building codes, and heritage conservation guidelines.
- Revised drawings based on consultant feedback, site conditions, and evolving client requirements, maintaining alignment with cultural and environmental priorities.
- Provided drawing clarifications and technical support to construction teams, facilitating accurate on-site implementation.
- Prepared detailed architectural drawings—including plans, elevations, sections, and construction details—for residential, commercial, hospitality, and institutional projects.
- Translated conceptual designs into precise shop drawings, integrating sustainable materials and heritage-sensitive detailing.

- Developed comprehensive as-built documentation reflecting actual site conditions and modifications, with attention to cultural context and material authenticity.
- Created high-quality 2D and 3D visualizations for client presentations, design reviews, and heritage board approvals.
- Drafted layouts and technical drawings using AutoCAD, Revit, and SketchUp, ensuring precision and clarity across all documentation.
- Applied sustainable design principles, including passive strategies and low-impact material selection, to support environmental performance and long-term resilience.
- Contributed to heritage architecture projects involving mudbrick restoration, stone masonry detailing, and timber structural integration, respecting local traditions and conservation standards.
- **Participated in cultural heritage assessments and design workshops to ensure architectural interventions preserved identity, context, and historical significance.**
- material compatibility reports, and conservation Supported documentation for heritage site approvals, including visual impact strategy briefs.
- Coordinated with local authorities and heritage consultants to align project outputs with preservation mandates and community expectations.
- Maintained organized archives of drawings, revisions, consultant correspondence, and heritage documentation for regulatory compliance and project continuity.

Junior Architect

2020 – 07/2021 | Karachi city, Pakistan

Lari Associates,

Draft precise technical drawings for heritage conservation and restoration of culturally significant buildings

- Document existing conditions through measured drawings, site surveys, and photographic records
- Assist in preparing restoration proposals aligned with traditional construction techniques and conservation ethics
- Coordinate with architects, historians, and artisans to ensure authenticity in material selection and detailing
- Support field teams during restoration phases with drawing updates and technical clarifications
- Contribute to visual presentations showcasing before-and-after restoration narratives using Lumion and Photoshop
- Maintain drawing archives and ensure compliance with heritage preservation standards and project guidelines
- Participate in workshops and exhibitions promoting architectural heritage and sustainable restoration practices
