PROFILE

Senior Electrical Engineer with 11+ years of experience in electrical site execution, cost control, and project management across large-scale, infrastructure, and governmental projects in Saudi Arabia. Certified PMP® professional, skilled in reviewing electrical systems, ensuring compliance, coordinating multidisciplinary teams, and delivering projects.

PROFESSIONAL EXPERIENCE

Cap France BAT Company – Saudi Arabia

(Electrical / Project Engineer) | Jun 2017 – Present

- Review and approve electrical shop drawings, BOQs, and material submittals for compliance with project specifications.
- Supervise and monitor site installation, testing, and commissioning of electrical systems (LV power systems, low current systems).
- Ensure quality of delivered materials and workmanship in line with standards and approvals.
- Allocate and manage resources (manpower, equipment, materials) to achieve project milestones.
- Coordinate with mechanical, civil, and architectural teams to resolve technical clashes during execution.
- Prepare and submit daily/weekly progress and technical reports to project management and client representatives.
- Enforce electrical safety practices and ensure compliance with HSE regulations at site.
- Lead troubleshooting and resolution of technical/site issues to avoid delays.
- Participate in site meetings with consultants, contractors, and clients to track progress and resolve concerns.
- Support project handover by coordinating with testing & commissioning teams and preparing as-built documentation.

(Electrical / Cost Control Engineer) | Jan 2015 – May 2017

- Review and approve cost sheets vs BOQ & budgets.
- Verify materials compliance with drawings/specifications before purchase.
- Analyze cost reports and reduced wastage.
- Collaborate with tendering team to align material pricing with market fluctuations.
