Career Objective

Seeking a challenging position as a **Construction Manager in Civil Engineering**, where I can apply my technical expertise, leadership skills, and project management experience to deliver high-quality construction projects. I aim to contribute to the success of the organization while continuing to grow professionally and develop innovative solutions in the field of civil engineering.

Key Projects

- **Buildings & Facilities:** Hotels, Hospitals, Residential Compounds, Malls, Administrative Buildings, Restaurants.
- **Educational & Institutions:** International School and Learning Centers.
- **Recreational & Religious Projects:** Mosques, 60-Acre Sports Club, Playgrounds.
- **Infrastructure Works:** Central Gas Stations, Fire Extinguishing Facilities, Underground Water Tanks, Road Construction, Rainwater Drainage Systems, Water Supply Networks, Sewerage Systems, Stormwater Networks
- **Commercial & Support Structures:** Steel Car Awnings, Car Parking Areas
- **Storage & Industrial Buildings:** Storehouses, Steel Hangars, Service Facilities
- **External Works & Landscaping:** Hardscape Works (paving, walkways, external finishes), Softscape Works (planting, irrigation systems).

Professional Experience

Construction Manager - civil engineer

- Plan, manage, and supervise civil engineering projects from initiation to completion, ensuring delivery within scope, time, and budget.
- Coordinate with architects, consultants, subcontractors, and suppliers to ensure smooth workflow and alignment with project requirements.
- Review and approve project drawings, technical documents, and material submittals to ensure compliance with specifications and standards.
- Prepare and monitor project schedules (using tools like MS Project or Primavera) to track progress and take corrective actions as needed.
- Manage project budgets, control costs, and issue regular financial reports to senior management.

- Ensure adherence to safety regulations and quality standards throughout all stages of construction.
- Conduct site visits, inspections, and meetings to resolve technical issues and assess progress.
- Lead and motivate site teams, assign tasks, and ensure effective resource allocation and productivity.
- Prepare and submit periodic progress reports, including risk assessments and mitigation strategies.
- Liaise with clients and stakeholders to provide updates and address concerns promptly and professionally.
