SUMMARY

Technical and Surveying Manager with a track record of successfully managing small and large-scale projects. Motivated construction teams and led surveying and technical team to achieve project goals. Skilled in sales and customer service, effectively enhancing communication and persuasion abilities.

SKILLS

- Surveying instruments
- Land surveying methods
- Surveying applications
- Internal and external communications
- AutoCAD
- Civil 3D modeling
- Topographic drawing
- Grading plan
- Road layout and profile
- Pipe network
- Microsoft Word
- Microsoft Excel
- Microsoft Outlook
- ArcGIS Pro

Imad Al Eid

Surveying Manager

EXPERIENCE

April 2025 - Current

Technical Engineer Wood Works Contracting Co. |
Riyadh, Saudi Arabia

- Led the design and implementation, balancing structural integrity with aesthetic appeal
- Optimized material usage and installation techniques to reduce costs and improve long-term performance.
- Resolved engineering challenges in real-time, enhancing project efficiency and client satisfaction.
- Conducted site assessments, prepared technical drawings, and supervised on-site installations to meet safety and quality standards.

April 2023 – February 2025

Surveying and Operation Manager Compass Surveying and
Engineering | Doha, Qatar

Managed projects across various regions in Qatar.

- 3D Laser Scanning and Mobile LiDAR: Spearheaded numerous projects utilizing 3D laser scanning and mobile LiDAR, leading to the successful capture and analysis of spatial data.
- Integrated data into BIM models and GIS databases, enhancing project accuracy.
- Topographical Survey: Directed topographical survey operations, ensuring precise land measurements and elevations were recorded for large-scale development projects.
- Implemented innovative surveying techniques that resulted in enhanced detail and accuracy of topographic maps.
- As-Built Survey 2D and 3D: Managed the creation of detailed as-built surveys in both 2D and 3D, providing critical documentation for infrastructure projects. These surveys have been instrumental in guiding subsequent construction phases and verifying compliance with design specifications.
- Control Points and Benchmarks: Established a robust system of control points and benchmarks that served as a reliable reference for scaling and integrating geospatial data across multiple surveying teams and projects.

August 2018 - April 2023

Chief surveyor/technical engineer Boom Construction Company |
Doha, Qatar

- Developed and implemented surveying methods to ensure accuracy of data collection.
- Supervised survey crew operations, ensuring all safety protocols were followed.
- Conducted surveys for construction projects such as roads, pipelines, and plots.
- Provided technical advice and guidance to staff members in the surveying and technical department.
- Submission of all shop drawings as per IFC or as per Qatar standard and QCS and make new design if required.
- Conducted clash analysis for site efficiency

PERSONAL INFORMATION

- Age: 33
 - Nationality: Lebanese
 - Marital Status: single
-

PROFILES

- [linkedin.com/in/imad-aleid](https://www.linkedin.com/in/imad-aleid)

- Adjust the utility as per site condition, following the standard details.
- Resubmitted shop drawing requests due to issues in drawings (clashing, new design, etc.).
- Preparation of survey reports for INR submission and follow up with QA/QC and consultant.
- Collaborated with consultants for request completion
- Facilitated alignment among site surveyors, engineers, and office staff.
- Supply necessary data for surveying team.
- Compiled surveyor data for accurate as-built drawing preparation.
- Assisted site team in drafting work plan.

December 2013 - January 2017

Land Surveyor Hassan Eleid Topography Office | Lebanon
(Part time)

- Worked on construction and surveying buildings, houses, plots.
- Calculation of quantity, cutting and filling, and other key factors.
- Preparation for profile and cross sections.
- Developed road infrastructure plans in the land assessment phase
- Preparation of surveying maps for architects with levels map, and contour line.
- Road works in a private infrastructure project (pipes, kerbstone, asphalt).

February 2013 - December 2013

Salesman/broker Allianz-sna insurance | Hazmiyeh

January 2012 - December 2012

Salesman Librex-riitello | Zalka

September 2010 - December 2011

Salesman & Maintenance AT mobile | Ain zhalta

EDUCATION

2018

Bachelor of science BSc | Surveying Engineering
Lebanese Canadian university, Hadat, Lebanon

2015

TS2 | Technical surveyor

Batloun technical institute - Batloun, Batloun, Lebanon

2012

BT3 architect drawing

Batloun technical school, Batloun, Lebanon
