Professional Summary

Greetings,

I am a Civil Engineer with a **Bachelor's degree in Civil Engineering** from the Higher Technological Institute (HTI) and over **9 years of experience** in the construction industry. While my career began in 2015 as a Freelance Structural Design Engineer, I have progressively specialized in **Procurement Engineering**, where I have developed strong expertise in **strategic sourcing, vendor management, contract negotiation, and cost optimization**.

Throughout my career, I have contributed to **mega construction projects**, including a **SAR 450 million project as Procurement Engineer** and a **SAR 800 million project as Senior Procurement Engineer**. Currently, I serve as **Senior Procurement & Purchasing Engineer at Al Kifah Contracting Co. (KCC)**, where I lead end-to-end procurement operations, manage supplier relationships, and ensure the timely delivery of materials and services to support large-scale construction projects.

My diverse background in **technical office, scheduling, and site supervision** further strengthens my ability to align procurement strategies with technical and operational requirements, ensuring efficiency, quality, and cost-effectiveness across all project stages.
