About Me

A highly experienced Civil Engineer with 8 years of expertise in executing and managing infrastructure and concrete construction projects for government projects. Specialized in site supervision and quality control, ensuring strict adherence to engineering standards and specifications. Worked with leading consulting firms, responsible for coordinating operations between teams and ensuring high-quality execution of projects, with delivery according to the project schedule and within the allocated budget.

Educational Qualification

- **Degree: Bachelor of Civil Engineering, Al-Jouf University**
Graduation Year: 2017

Work Experience

- **Abdullah Al-Saaid Consulting Engineers - HSE Engineer | 2025 - Present**
 - Occupational Health and Safety Engineer – Abdullah Al-Saeed Consulting Engineers
 - Oversee the implementation of occupational health and safety standards in water and wastewater network expansion projects for the National Water Company (NWC).
 - Supervising contractors' work and ensuring full compliance with approved safety standards and regulations.
 - Conducting daily site inspections and audits to identify hazards and ensure proactive safety measures.
 - Reviewing and refining contractors' HSE documentation, including Safety Plans, Risk Assessments, Emergency Plans, & Work Permits.
 - Monitoring and analyzing Key Performance Indicators (KPIs) to track progress and enhance overall safety performance.
 - Holding weekly meetings with contractors and client management to review safety observations and performance.
 - Conducting awareness sessions, workshops, and emergency drills to promote a strong safety culture and improve readiness.
 - Preparing professional reports, risk analyses, and recommendations to maintain a zero-incident work environment.
- **Khateeb & Alami Consulting Engineers - Civil Engineer | 2022 – 2025**
 - Construction Supervision & Project Management – Ministry of Interior Government Buildings
 - Supervised multiple high-value construction projects directly for the Ministry of Interior, with budgets totaling millions of SAR, ensuring compliance with timelines, specifications, and quality standards.
 - Reported daily progress directly to the Ministry of Interior, providing detailed site updates, identifying delays, and recommending corrective actions.
 - Monitored and managed project schedules, coordinated work sequences, and ensured efficient allocation of resources across multiple sites under the Ministry's scope.
 - Implemented and enforced strict quality control and assurance procedures, ensuring construction met government specifications, safety standards, and Ministry requirements.
 - Collaborated closely with contractors, consultants, and Ministry representatives to resolve technical issues and optimize project execution.
 - Actively participated in project planning and risk management, demonstrating strong decision-making and leadership skills consistent with project management responsibilities.
 - Oversaw all aspects of site operations, including materials inspection, subcontractor supervision, and adherence to HSE protocols, ensuring smooth and safe project delivery under Ministry supervision.
- **Al-Fouzan General Contracting Company - Quality Control Engineer | 2020 – 2022**
 - Ensured quality compliance for the Al-Jouf Airport Development Project, adhering to specifications.
 - Conducted detailed testing of materials (concrete, soil, steel), ensuring compliance with engineering standards.
 - Supervised the installation of infrastructure networks (sewer, water, and electrical) with precision and accuracy.
 - Documented and maintained quality control records throughout the project lifecycle for smooth handovers.
 - Collaborated with project teams to mitigate quality-related challenges, ensuring seamless project execution.

- **EG&G Middle East - Site Engineer | 2018 – 2020**

- Managed the construction of 400 residential units for the Customs Authority, focusing on structural integrity.
- Supervised critical concrete works, including foundations, columns, slabs, and beams.
- Inspected materials for compliance with safety and technical requirements prior to use.
- Resolved on-site technical challenges swiftly to maintain smooth workflows.
- Ensured compliance with occupational safety standards, fostering a secure construction environment.

TRAINING COURSES

- OSHA Occupational Safety Course.
- Project Time Management Course.
- Surveying Course.

SKILLS

- Advanced Project Management
- Strong Analytical and Problem-Solving abilities
- Proficiency in Quality Assurance Processes
- Exceptional Time Management and Multitasking
- Proficiency in Quality Assurance Processes
- Attention to detail with a focus on technical accuracy

LANGUAGES

- Arabic: Native
- English: Professional Proficiency
