MY CONSTRUCTION PHILOSOPHY

A construction philosophy that focuses on adding value to communities adopts a holistic approach, prioritizing not only functional buildings but also long-term benefits, social upliftment, and sustainable growth. At its essence, this philosophy considers every project an opportunity to strengthen the social fabric—by delivering infrastructure that improves accessibility, safety, and quality of life for present and future generations. Decisions are guided by the belief that construction is both a technical and ethical responsibility: every action during planning, design, and execution should help communities thrive, foster pride, and support collective wellbeing.

Community value creation in construction begins with meaningful stakeholder engagement. By actively involving residents, local authorities, and end users in project visioning and design phases, the construction expert ensures that facilities truly respond to actual needs—whether that's improved transport, education, healthcare, or recreation. This inclusive dialogue fosters local ownership, trust, and advocacy, turning physical assets into social anchors. When a project aligns with community aspirations and cultural context, it becomes a catalyst for further economic and social development, laying the groundwork for resilience and long-term growth.

Resource stewardship and sustainability are critical pillars in a value-driven construction philosophy. The responsible use of materials, prioritization of green technologies, and protection of natural environments are central values. By embedding principles such as energy efficiency, waste minimization, and lifecycle value into every project, the construction process reduces negative externalities and leaves a positive legacy. Community health, safety, and environmental quality are treated as non-negotiables—a reflection of the industry's broader duty to nurture, preserve, and enrich the built and natural environments where people live and work.

Ultimately, professional construction experts strive to create shared value by facilitating learning, capacity-building, and generational growth within the communities they serve. This is achieved through transparent knowledge-sharing, supporting local suppliers and workforce, and promoting participation in all phases of the project. The goal is not simply to construct buildings, but to foster civic pride, enable skill development, and lay foundations for ongoing collaboration. In this way, the construction philosophy becomes a vehicle for public benefit, community empowerment, and enduring progress, elevating communities far beyond the physical assets delivered.

Projects Director

Riyadh, Saudi Arabia

moftahosama@yahoo.com

Cell: +966 (55) 270-3910

OBJECTIVE

With acquired 30+ years of construction experience, ambitious to growing in the field, enthusiastic desire to excel, in addition to previous contributions into the success and prosperity of preceding Employers, of which I had been a key factor of many successful stories to all, I have a great confident that I will be a valuable asset added to your Organization, where more successful stories and contributions into its prosperity and development would be incorporated and added to its history.

HIGHLIGHTS

- Saudi Council of Engineers accredited Architect with an active *SCE* membership registration.
- Highly self-motivated **CANADIAN construction expert**, with over **31+** years of an effective management abilities in mega/large scale projects from inception to completion, with a strong construction background developing & implementing comprehensive risk management frameworks and policies in all construction types, including property and hospitality sectors.
- Annotative and lucrative project management leadership personality, with proficiency in project management tools applications and methodologies.
- Change champion with astute contract administration dexterity.
- Value Engineering professional with a solid multinational Engineering practices experience and background.
- Precision in material takeoffs and tendering estimation for different project types.
- Project planning and scheduling proficiency using *MS-Project*.
- Solid technical background with strong leadership and communication skills to effectively manage teams with excellent coordination liaison skills between all project stakeholders.

EDUCATION

Master of Science (M.Sc.) Construction Management

George Brown College, Toronto, ON, Canada

(Jan 2013-Dec 2013)

Masters of Science (M.Sc.) Civil Engineering Software Applications

Humber College, Toronto, ON, Canada

(Jan 2012-Dec 2012)

Bachelor of Science (B.Sc.) Architecture & Engineering (5 Years)

Alexandria University, Alexandria, Egypt

(Sep 1990-Aug 1995)

PROFESSIONAL EXPERIENCE

Construction & Logistics Director

AECOM Saudi Arabia, Riyadh, Saudi Arabia

Jan 2024-Oct 2025

AECOM is one of the Kingdom's largest urban design and civil infrastructure consultancies, AECOM is helping development leaders to better prioritise projects, planning ahead to provide sustainable growth of their communities, to add values, and provide prosperous communities:

DIVCO Buildings (5 No's – Design/Build) Package

US\$ 275M.

Project-Wide Logistics Package

Existing Blocks DEMO Package

Project-Wide Wayfinding & Security Package

Five Stars 32 Stories Hotel, Hospitality Package

- Led a large infrastructure and civil construction delivery Team for the planning, staging and executing five construction packages across the Diriyah Gate Three (DGI&DGII) mega project.
- Developed packaging strategies with Contractors, ensuring alignment with budgets, milestones, and governance, throughout applying contract and methodology knowledge to support safe execution and risk mitigation.
- Assembled an integral Project Logistics Management Plan that is consolidate with both Project Quality and Execution Plans in providing a smooth progress and top-quality deliverables of assigned packages.
- Managed and executed Project Environmental targets by controlling and monitoring more than 986,000 M3 of construction waste material resulting from demolition activities of the DGII project.
- Delivered an inclusive and dynamic Logistics & Risk Mitigation Plans to facilitate required mobilization of 54 project stakeholders sitewide, identifying and analysing potential risks that could affect project delivery.
- Monitored operational and critical activities, and provided correlated reports to Top Management with mitigation strategies to ensure timely deliverable within Client's approved Safety & Quality procedures throughout assigned workflows and instant inspections.
- Directed, coordinated and managed progress meetings with project stakeholders, Client's Reps, PMC, Subcontractors, and project Teams, to ensure common understanding of short term and long term plans are well communicated and implemented.
- Monitored, reported and developed an extensive dynamic logistics plans to ensure undisturbed equipment maneuvering and undisturbed material delivery throughout 24/7 for all stakeholders.
- Coordinated with Governmental Authorities project stakeholders to obtain required permits for the execution of Planned Logistics activities, blending main contracting and consultancy experience.
- Enforced safety and security measures to ensure secured boundaries for both public and construction safety.

**PROFESSIONAL
EXPERIENCE**
(Continued)

Senior Project Manager

Nov 2022-Dec 2023

DEPA Contracting Co. Ltd., Riyadh, Saudi Arabia

Depa Group is a Main Contractor that comprises three key business units and investments, which span various sectors of the ICI & infrastructure construction market, The Group delivers hospitality, commercial (offices and retail), social infrastructure, economic infrastructure, yachts and marine, high-rise and low-rise residential, and aircraft projects in selected countries in the Middle East and North Africa, Europe, Asia, and North America:

Red Sea Seven Stars Resort (137 Units – Design/Build) Package **US\$ 165M.**

Project-Wide MEP & Infrastructure (137 Units – Design/Build) Package

Back of House Facilities Finishes & Fit out Package

- Led in collaboration with client, consultants, contractors, and stakeholders to successful delivery of assigned design from conceptual to IFC, integrating high level of logistics planning and quality management plans.
- Built up local and abroad logistics Teams to facilitate smooth coordination of assets, materials and Subcontractors delivery to jobsite from UAE to KSA locations.
- Managed Logistics & Quality aspects of both construction and logistics activities, starting from planning to execution, incorporating planned logistics procedures, Company Policies, and as per Client requirements.
- Delivered infrastructure scope of Hospitality project of Wet and Dry utilities of (7) stars resort for 78% of assigned Budget saving 22% of total direct cost.
- Demonstrated “Safety First” principles throughout the project, incorporating Company’s policies to maintain project plans, risk management strategies, and quality systems aligned with Services Excellence.
- Executed an extensive procurement plan by managing dynamic logistics procedure well coordinated with project Stakeholders guaranteed smooth material/equipment delivery onshore and offshore sides of the Project.
- Coordinated the delivery and execution of Civil/Architectural scope of work with both domestic and abroad Subcontractors and Suppliers, including marines and civil activities.

Senior Project Manager

June 2012 - Oct 2022

EllisDon Corporation, Toronto, ON, Canada

EllisDon Corporation is an international North America construction leader with ambitious and Innovative portfolios of construction/consultancy management strategies. With 18 worldwide & Domestic branches and operation centres, EllisDon sets out the principals and level of quality among Proponents:

Platinum LEED, DSV Industrial Facility (Design/Build) Project **US\$ 185M.**

Gold LEED, High Speed Train Project (Design/Build & Finance) **US\$ 125M.**

Silver LEED, Ontario’s Largest Commercial Mall (Design/Build & CM/GMP) **US\$ 115M.**

- Led the design and execution of 1,000,000 sq.ft. Industrial DSV largest facility in the North America region, incorporating high end interior/exterior design of modern most intelligent BMS fully operated Admin Buildings.
- Managed extensive procurement scope of Suppliers and Subcontractors of specified scope and deliverables of fast-track project, ensure timely delivery and budgetary implementations.
- Supervised & monitored applications and implementations of environmental procedures of LEED protocols, verifying implementation of approved LEED procedures and instructions.
- Directed the planning and execution of 1,000,000 sq.ft. of concrete fairfaced slab on grade, applying high level wide flatness and levelness quality control procedures.
- Coordinated the design/prefinished scope, heavy lifting and the erection of long spanned crossing over structural steel bridge, over rail track, between US & Canadian rail authorities, with a successful erection operation.
- Implemented procurement plans and procedures to ensure smooth delivery of long lead equipment and finishes, matching baseline schedule and planned deliverables.
- Developed key delivery milestone mapping, incorporating authorities approvals, permits issuance, and design review processes to enable planned progress as per approved schedule.
- Successfully hired project Subcontractors and delivered project tender packages of \$16.8+ million under budget through analyzing, reviewing and awarding process.
- Conducted and performed QHSE Audits and fields inspections with project Third parties.
- Coordinated and negotiated changes as per running progress, records, and existing site conditions, to profitably increased company earnings by 3.35% of total project budget of commercial project.
- Influenced the planning, coordination and execution of Quality Management Plan that encompasses Company’s Policies, project specifications, Client requirements, and Authorities guidelines.
- Coordinated planned 3D modeling over all projects to ensure excellent clash free interference with all disciplines and MEP design, ahead of execution, preventing time/cost impact.
- Procured and managed design teams, consultants, and stakeholders, ensuring scope, fees, and variations are controlled and processed.
- Analyzed and mapped budgetary elements and components that adheres to projects execution plans and complies with cash flow schedule to ensure healthy financial environment of the project.
- Organized, tracked and coordinated design changes with Consultants and Client’s representatives, to analyze and verify eligibility and application, increasing revenue of project for 2.1% to 2.64% on assigned budget.

**PROFESSIONAL
EXPERIENCE**
(Continued)

Senior Project Manager

March 2003 - April 2012

Kharafi Group_ Kharafi National (KN), Al Ahmadi, Kuwait

A leading infrastructure project developer, enhanced oil recovery as well as contracting and facilities Management service provider for petrochemical, power, water, highways & commercial buildings in the Middle East:

Jaber Al Ahmed Residential City, (Bid/Build) Project	US\$ 481M.
JGSK Clean Fuel Refinery, Petrochemical (EPC Contract) Project	US\$ 306M.
Booster Station 160 Refinery, Petrochemical (EPC Contract) Project	US\$ 375M.
Aromatics Refinery, Petrochemical (EPC Contract) Project	US\$ 285M.
Ethylene Glycol II Refinery, Petrochemical (EPC Contract) Project	US\$ 165M.
Jaber Al Ahmed, International Stadium, (Bid/Build) Project	US\$ 375M.

- Successfully delivered \$54 million multi-functional public buildings of largest Kuwaiti residential community project for Government Authorities, for all project lifecycles.
- Managed infrastructure Subcontractors and delivered project infrastructural services as mentioned and specified on project documents.
- Developed, in association with Design department, exclusive work procedures, in accordance with project specification, that abbreviated execution durations while maintaining quality level.
- Provided technical review assistance to develop and finalize project design with 1.35% savings on total project indirect costs.
- Maintained and supervised quality inspection activities within a planned fast track project.
- Managed project resources resulting in (130%) progress advancement with (1.15%) budget savings.
- Provided/planned large scale logistics plans for both green and brown fields, to ensure on time efficient material and equipment delivery achieving 12.8% cost saving of assigned budget.
- Managed Changes of original scope and achieved (15%+) budget increase of original contract.
- Supervised, managed and motivated an onsite large Team of (300+) of Non-manuals and 4000 Manuals.
- Develop project budget and schedule, control expenditures, material procurement within approved Client authorization in accordance with applicable by-laws, including project financial applications.
- Managed, supervised and delivered fast track heavy structures concrete/earthwork activities complying with international project quality standards and top Quality & Safety plans.
- Monitored, organized and contributed to the enforcement of HS&E Company's policies and procedures, acquiring many credentials, rewards, and appreciations from both Top Management and Client Top Management, leading into ZERO LTA across project lifecycles.
- Participated in value engineering process to develop execution procedure of which resulted into 2.5% saving on budget and project schedule.
- Performed regular field inspections, provided supervision and technical support to ensure smooth performance of construction and installation of material and equipment.
- Provided analytical feedback of quality of execution and proposed corrective actions to prevent time loss of project schedule.
- Established and prepared project requirements, procurement and planning for petrochemical plant and obtained necessary input to perform civil design.
- Managed, performed and supervised execution of largest nuclear reactor in Middle East with capacity of 1750 tons and related processing structures
- Conducted and coordinated quality audits and inspection with project Client on regular basis to ensure deliveries on time and in accordance to quality requirements.
- Prepared and maintained inspection reports/records and applied computer quality database tracking with project stakeholders.
- Assisted and participated in technical document composing to facilitate equipment inspection and installation.
- Conducted quality assurance and installation procedures sessions to site supervisors to reduce and mitigate non-conformances with required corrective applications.
- Provided constant field supervision assistant for heavy concrete structure execution process, including post tensioning structure and fly concrete formwork methodology.
- Managed the execution of major part of the project (VIP Zone) delivering structural execution per construction schedule with high end finishes quality.
- Reviewed, implemented and applied quality measures on precast elements execution and installation to assure quality requirement delivered as per project QMP.
- Participated in earthwork inspections, monitored and controlled execution stages corresponding to project specifications and quality procedures.
- Accomplished scheduled target and delivered concrete activities ahead of schedule of an international stadium project.
- Achieved planned target of concrete works completion planned date and delivered assigned scope of work ahead of schedule for a duration of Nine (9) months instead of Fourteen (14) months per Project Baseline.
- Planned and executed all Infra scope of work with each service System network, including and not limited to, Sewage, Water Supply, Irrigation, Electrical, Fire Fighting, and Low Current Systems, ahead of schedule.

**PROFESSIONAL
EXPERIENCE**
(Continued)

Project Coordinator/Field Engineer

Aug 1995 - Dec 2002

The Arab Contractors & Co., Alexandria, Egypt, Heavy Civil/HST Construction (*HST Station & 8 No's of Railway Bridges*)

The Arab Contractors is a leading giant in Egypt, and one of the leading construction companies in the Middle East, Europe and Africa. The company provides multi-construction services for bridges, roads, buildings infrastructures, engineering consultation and construction management over 29 countries worldwide consist of 77,000 employees:

Road Bridge & Rail Crossing-Over Bridges (18 No's), (Bid/Build) Project	US\$ 120M.
High Rise Residential Tower, Skilton & Finishes, (Bid/Build) Project	US\$ 57M.
Borg Al Arab Hospital, (Bid/Build) Project	US\$ 75M.
Water Treatment Plant & Pumping Substation, (Bid/Build) Project	US\$ 35M.
Infrastructure Development (Sewer/Watermain Lines), (Bid/Build) Project	US\$ 16M.
Institutional Schools (5 No's), (Bid/Build) Project	US\$ 37M.

- Generated and assembled *Project Quality Management Plan (QMP)* in accordance with ISO 9001 for ICI and heavy construction project including highways and bridges as specified project elements.
- Led site investigation for design initiation process, and provide required survey reports reflecting site condition and facilitation design to proceed.
- Carried out scaffolding management, manpower & Staff assignment, equipment and material maneuvering to ensure effective resource allocations and progress advancement.
- Nominated as youngest project manager with five (5) years of accumulated construction experience by Company's Top Management.
- Coordinated with project Consultant and Client's Representative all site inspections and structural items to progress as per project schedule.
- Participated and directed the assembly of construction methodology and developed project execution schedule to maintain cost savings and achieve targets.
- Performed high rise building quality management audit plan, activities workflows, and inspection procedures, as per ISO 9001 certificate, project specifications, and Client requirements.
- Achieved concrete Skelton completion ahead of schedule, and initiated the interior finishes packed earlier than planned.
- Coordinated the design on building envelop and façade for 21 stories of high-rise residential tower, incorporating value engineering to achieve budget savings.
- Managed subcontractors awarding scope for the execution of multi stories 1250 beds governmental hospital
- Verified and issued payment applications for both Client and Subcontractors during project lifecycles.
- Initiated quantity surveying procedure to maintain cost control methodology to enhance risk management and monitor project expenditures.
- Led team of project Staff within project schedule setting up major milestones and handed over project ahead of schedule.
- Led the execution of water treatment plant and pumping station to facilitate the development of infrastructure project ahead of schedule with (114%) progress rate.
- Managed critical excavation methods within congested residential neighbourhoods to enable the installation of sewer and water lines, as per Company's HSE policy and LTA free.
- Coordinated project infrastructure procurement with head office to ensure material delivery on timely manner avoiding delays and minimizing project risks.
- Led the execution on five (5) elementary schools starting excavation to turnkey stage.
- Coordinated material delivery and manpower deployment as per site condition, planned schedule, and Client's requirements.
- Managed the financial Client's payment applications, and verified Subcontractor's invoices to ensure symmetrical progress verifications and to control budget and project cost expenditures.

Darcy Mcivor, Health & Safety Manager

Subject: Commitment to Excellence in Health & Safety

Dear Osama,

It was recently brought to our attention how you handled a situation with a member of the public. Although we are in the process of creating a formal Recognition and Rewards program, we didn't want your commitment to Health and Safety to go unnoticed.

Please accept this letter and gift certificate as a small token of our appreciation that you went out of your way to help a member of the public and were a positive ambassador for CTS.

Over the next quarter we will be launching a behavioural and cultural program to underpin our need to deliver excellence in everything we do. This program will be centred on supporting our H&S, Environmental and Quality teams and has the goal of engaging everyone working for CTSC- in achieving that excellence.

We thank you for being an early adapter of this commitment. Thank you for being part of the CTS team.

Thank you,

TO WHOM IT MAY CONCERN

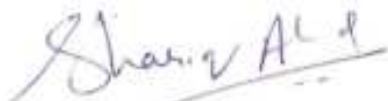

25 September 2007

During the past year Mr. Osama Moftah has performed the duties of project Engineer for the Ethylene Glycol Unit EG2 on the OL2K project in Kuwait.

Mr. Osama has a very high work standard and always willing to help others. His work was of highest quality. He was always at work on time and was a team player. Through his efforts, the EG2 project developed the highest level of Quality and safety. He takes safety very seriously, we never had a lost time incident and there were 1400 workers on the site. He has big contribution for the project in achieving 20 million safe man hours.

I highly recommend Mr. Osama for a suitable position on another assignment.

It has been a pleasure working with Mr. Osama.

Shariq Ahmad
HSE Coordinator EG-2
Fluor Daniel
(OLEFINS II Project)

To whom it may concern.

Reference: Mr. Osama Ibrahim Mahmoud Moftah.
Area-civil engineer- MAK / Kharafi National.

I have had the pleasure of working with Mr. Moftah on the KPPC-Aromatics project in Kuwait. As the 'Lead-Mechanical-engineer' I have been in constant involvement with parallel mechanical / civil activities that Osama has supervised. He has taken a strong leadership stance in all of the project activities he has been involved in, and he has earned the utmost respect of his work colleagues and subordinates. He is a firm advocate in safety practice and principle, which he carries to the field and daily safety talks and JHA formation. He carries out his daily activities in a highly professional manner, which has earned the respect of the project field-engineering-department. I would have no hesitation in recommending him to any prospective employer, and can only wish him the future that he so richly deserves.

Regards.

William D. Morton.
Lead mechanical Eng.-Supervisor.
