Riyadh, Saudi Arabia

15 OCT, 1998

EDUCATION

Bachelor of Civil Engineering , (2017- 2022)

A dedicated civil engineer with hands-on experience in managing construction sites and executing various stages of structural and finishing works. Specialized in reinforced concrete execution and interior finishing with a strong command of quantity surveying based on technical drawings and specifications. Highly capable of coordinating with project teams and subcontractors to ensure smooth workflow, high-quality output, and timely delivery. Always driven to add value to projects by adhering to top standards of quality, safety, and strategic planning.

WORK EXPERIENCE

Site Civil Engineer

(Dec2024 – May2025)

Ithraa Dubai Contracting Company, Al Khobar – Saudi Arabia

- Supervised civil and structural works for mid-scale residential and commercial projects.
- Coordinated daily site activities with subcontractors, consultants, and project stakeholders to maintain high-quality standards and ensure timely delivery.
- Assisted in preparing BOQs and material take-offs based on updated shop drawings and site conditions.
- Reviewed site execution versus project timelines, reporting progress and resolving on-ground technical challenges.
- Applied safety protocols and quality assurance measures to maintain compliance with Saudi construction standards.

Site Civil Engineer

(Sep 2022) (Oct 2024)

Al Mothda Contracting Company, Beni Suef – Egypt

- Oversaw the full scope of construction activities for a residential building project, ensuring high standards of quality and performance.
- Ensured all work was carried out in accordance with approved drawings, architectural and technical specifications.
- Managed daily operations on-site, including supervision of labor teams and subcontractors to ensure compliance with timelines and contractual obligations.
- Monitored material quality and ensured conformity with project specifications and standards.
- Prepared and coordinated daily work activities based on execution and design drawings, submitting them to the consultant for review and approval.
- Executed accurate quantity surveying for all work elements.
- Conducted finishing works including painting, tiling, ceilings, and MEP installation in compliance with high-quality standards.
