IQAMA: Transferable

PROFESSIONAL SUMMARY

Electrical Engineer with 5+ years of experience across Construction, Power, Energy Sectors & Utilities, possessing key skills including Leadership, Project Management, Erection & Commissioning, Reliability, Analysis & Improvement. I specialize in project planning, monitoring, controlling, and management. Comprehensive Knowledge of electrical codes & standards (**IEEE, IEC, NFPA, OHSAS, ISO, FAT & SAT**).

EXPERIENCE

T10 CO. Ltd – Amaala, Saudi Arabia

Electrical Testing & Commissioning Engineer

Nov 2025 – Present

- Verify that electrical systems meet design specifications, standards and regulations.
- Identify and rectify faults or defects in electrical systems during testing and commissioning.
- Conduct pre-commissioning checks and inspections, including functional testing of electrical equipment, to ensure readiness for full commissioning.
- Develop and manage the Snags List (Punch List) during the commissioning phase to track and resolve issues or incomplete tasks.
- Prepare energization documentation, including test results, system configurations and any issues resolved during energization.
- Work closely with installation teams to ensure that electrical systems are installed correctly and meet specifications.
- Maintain accurate records of testing and commissioning activities, including test reports and certification documents.

FEMTO Building Contracting CO. – Sindalah Island, Saudi Arabia

Electrical Engineer

July 2024 – Oct 2025

- Familiar with project requirements, electrical design, and specifications.
- Ensuring that electrical materials and equipment meet project specifications and standards.
- Evaluating site conditions to ensure they are suitable for electrical installations.
- Inspecting electrical installations, wiring, and equipment to ensure compliance with project specifications and standards.
- Detecting and documenting any defects, deficiencies, or safety hazards in electrical systems.
- Witnessing and verifying electrical testing and commissioning procedures.
- Keeping accurate records of inspections, test results, and corrective actions.
- Preparing detailed reports of inspection findings, including recommendations for corrective actions.
- Informing project stakeholders, including contractors and project managers, of inspection findings and recommendations.
- Verifying that electrical installations meet relevant codes, standards, and regulations.
- Developing and implementing quality control processes to ensure electrical systems meet project requirements.
- Identifying areas for improvement and recommending corrective actions to prevent future defects.
- Ensuring that electrical installations are safe and meet relevant safety standards.
- Identifying potential safety hazards and recommending corrective actions to mitigate risks.

Khabeer Al-Raida Contracting Company – Al Khobar, Saudi Arabia

Electrical Site Engineer

May 2024 – Jun 2024

- Insulation & Conductivity and Operational Test of Lighting Unit.
- Insulation & Conductivity and Operational Test of Power Unit.
- Operational Test of LV Panel.

- Modifying SLD, updating sketches as-built & gaining approval from the consultant.
- Test and evaluate electrical components and systems to ensure they meet design specifications and safety standards.
- Conduct performance testing, troubleshooting, and diagnostics to identify and resolve issues.

Fatima Group – Pakistan

Electrical Engineer

Feb 2023 – April 2024

- Conduct Testing of LV Switchgears.
- Conduct Electrical Testing of Transformers and Ring Main Unit (RMU).
- Conduct Electrical Testing of Power Socket, Lighting, Feeder Cables, and Continuity.
- Oversee the Installations, Testing and Commissioning of Electrical systems including Power Distribution, Lighting and Control Systems.
- Controlling, maintaining of the Electrical Blueprint (standards, procedures, drawing and BOM), hazardous area checking, and on-site safety audit.
- Implement & ensure compliance with Project Quality Plans and Mandatory Quality Practices.
- Checking the Availability of Resources and Coordinating with focal points from company side as well as client side for safe and Quality Execution.
- Monitoring the project progress with the plan, tracking performs cemeteries, and taking necessary actions to cover the works as per schedule.
- Ensuring safety and adopt work permit system during job execution.

Fauji Fertilizer Ltd – Pakistan

Electrical Engineer

Oct 2021 – Jan 2023

- Technical Training before Implementation, Testing and Commissioning.
- Manage the Site Engineers, technical supervisors and technicians to get up-to-date information.
- Well knowledge and Hand-On experience Solar Panels.
- Tracking Systems & LOTO implementation.
- Conduct meetings to describe the goals and objective with define timeline.
- Work and coordinate with other disciplines like Civil, Mechanical during life cycle of project.
- Implementation of standards, policies and quality management systems (QMS) to QA/QC.
- Responsible to maintain correct inventory and inspection records and checklists.
- Testing Switchgears, Cables, Inverters, LV/MV Panels, PV Panels, Transformers.
- Receives all the material, equipment and tools.
- Ensures all the necessary material required to start the work and made ready at least one or two days before.

Bestway Cement Limited – Chakwal, Pakistan

Trainee Engineer Electrical

June 2019 – July 2020

- Supervised and coordinated the activities of workers engaged in installing, repairing, and inspecting PV System field electrical equipment. Oversaw the work of teams involved in handling primary and secondary power lines.
- Managed the installation, repair, and inspection of diverse PV system field electrical equipment. Ensured compliance with safety standards and industry regulations during all electrical activities.
- Coordinated the deployment of electrical infrastructure, including transformers, DC cables, and power lines, to solar sites. Ensured the efficient functioning of electrical systems in locations.
- Supervised and provided leadership to the team, fostering a collaborative and efficient

working environment. Conducted training sessions to enhance the skills and knowledge of workers.

- Adapted to dynamic work requirements and contributed to the overall success of the projects.

EDUCATION

FOUNDATION UNIVERSITY ISLAMABAD – Rawalpindi, Pakistan

Bachelor of Sciences, Electrical Engineering

2017 – 2021

ADDITIONAL

Technical: AutoCAD, Microsoft Office,

Languages: Fluent in English & Urdu/Hindi; Conversational Proficiency in Arabic.

FEMTO

BUILDING CONTRACTING L.L.C

FEMTO Building Contracting Co.

Al Murar – Dubai - UAE

October 15, 2025

TO WHOM IT MAY CONCERN

This is to certify that **Mr. Muhammad Hamid Javaid** has been working as an Electrical Engineer in our Company FEMTO Building Contracting Co. from July 02, 2024 to October 15, 2025.

During his tenure with our company, **Muhammad Hamid Javaid** was responsible for designing, installing, and maintaining electrical systems for **Sindalah Island Project NEOM**, Saudi Arabia. He has demonstrated a high level of technical expertise and professionalism in his work.

Key Responsibilities:

- Designed and implemented electrical systems for commercial and industrial projects.
- Conducted site inspections and ensured compliance with safety regulations.
- Collaborated with other engineers and contractors to ensure project timelines and budgets were met.
- Troubleshoot and resolved electrical issues that arose during construction.

Skills Demonstrated:

- Strong knowledge of electrical systems and codes.
- Excellent problem-solving and analytical skills.
- Effective communication and collaboration skills.
- Ability to work under pressure and meet deadlines.

We appreciate **Muhammad Hamid Javaid** contributions to our company and wish him all the best in his Future endeavors.
