

COVER LETTER

Respected Sir,

I am a Land Surveyor with 14 years of experience in infrastructure, buildings, and bridge projects. I am currently working with Ethmar contracting (Saudi Arabia) and I am seeking new opportunities to further contribute my skills and expertise.

I believe my background and experience align well with your requirements, and I would be honored to be considered for a position within your team.

Please find attached my resume, which outlines my qualifications and project experience in detail.

Thank you for your time and consideration.

SAUDI ARABIA (K.S.A)

Objective:

An efficient well-organized and positive thinking individual with effective presentation and combinations skills with the ability to prioritize and plan forward. I am also an enthusiastic, Energetic, loyal and friendly kind of a person.

Roles & Responsibilities:

1. Building works:

Building Projects include residential, Commercial, industrial, or institutional structures. Accuracy in vertical and horizontal positioning is crucial.

Setting Out.

- Setting out building grids, foundation lines, and structural layouts.
- Positioning of columns, shear walls, footings, and core walls based on Architectural and structural drawings.

Structural Surveying.

- Checking verticality and plumb of columns, walls, lift cores, and other Vertical elements.
- Ensuring correct alignment and levels of Beams, Slabs, Staircases, and Roof elements
- Coordinating with structural and site engineers for timely survey Inputs.

Monitoring and Controls.

- Maintaining survey control networks throughout the construction Phases.
- Regularly updating as-built survey drawings.

Quality assurance.

- Ensuring all setting out is as per approved shop drawings and within specified tolerances.
- Coordinating with QA/QC for inspection and approval of key stages (e.g. column setting, beam levels).

Record Keeping.

- Preparing daily/weekly survey records and logs.
- Provide necessary details for preparing as built Drawings.

2. Roads and infrastructure work.

Surveying & setting out.

- Setting out of pipelines, manholes, chambers, ducts, Roads, kerbstone, Street lighting foundation, etc.
- Establishing and maintaining control points and benchmarks.
- Providing accurate alignment and grade stakes for excavation and installation.

Levelling & Alignment.

- Performing Precise site levelling, trenches and other excavations.

- Check line and level during pipeline laying.
- Insuring correct invert levels and slopes for sewerage and stormwater systems.

Manhole & Chamber Works.

- Checking shuttering and alignment of manholes and valve chambers, etc.

Testing and inspections.

- Overseeing pipeline testing procedures (e.g. hydrostatic, air or leak tests).
- Verifying as-built levels and dimensions.
- Preparing survey reports for QA/QC documentation.

Quantity Surveying and Records.

- Preparing and maintaining measurement sheets.
- Recording work quantities based on actual field data.
- Provide all details of building units, Utilities, and Road works for preparing as built Drawings.
