Professional Summary

Electronics and maintenance specialist with a strong academic background from the Technical College and hands-on experience in electronic system installation and sensor integration. Successfully completed a cooperative training at BEC Arabia, gaining practical skills in wiring, electrical components, and safety protocols. Adept at working within technical teams and executing tasks with precision and efficiency. Seeking to contribute technical knowledge in an environment that fosters continuous learning and innovation.

Education

Diploma in Electronics | Technical College – Madinah | 2025

Professional Training

BEC Arabia | Cooperative Training – Electronic Maintenance

- Installed electrical and electronic components in new buildings.
- Identified and handled various types of electronic sensors.
- Conducted electrical wiring according to safety standards.
- Gained practical knowledge of control systems.
- Applied general safety procedures during on-site operations.

Training Courses

English Language Course – Level 3 | Oxford Academy

Skills

Personal Skills: Self-learning ability | Commitment and accuracy | Effective communication | Attention to detail | Analytical thinking | Time management | Negotiation skills | Working under pressure

Professional Skills: Electronic system maintenance | Electrical wiring | Sensor installation | Team collaboration | Control system knowledge | Circuit testing | System efficiency enhancement | Technical diagram reading

Technical Skills: Microsoft Office | Measuring and testing devices | Electronic simulation software | Circuit analysis | Fault diagnostics | Basic system design | Computer proficiency | Microcontroller programming
