## 📄 SUMMARY

Accomplished Senior Civil Engineer with over 13 years of experience managing large-scale construction and infrastructure projects in the UAE. Highly skilled in project execution, planning, design, and team leadership, ensuring the delivery of high-quality results on time and within budget. Adept at managing all stages of the project lifecycle, from initial concept through to completion. Proven ability to drive efficiency improvements, reduce costs, and collaborate seamlessly with multidisciplinary teams. Committed to excellence in safety, regulatory compliance, and client satisfaction.

## 📁 WORK EXPERIENCE

06/2015 – Present

### **Project Engineer**

Rals Contracting L.L.C

- Oversee all phases of civil engineering projects, from concept and design to construction and final delivery, ensuring the adherence to timelines, budgets, and quality standards.
- Manage and supervise site operations, ensuring that work is completed in compliance with engineering standards, safety protocols, and environmental regulations.
- Lead and mentor junior engineers and project teams, providing technical guidance and ensuring high standards of performance.
- Coordinate with architects, contractors, and other engineering disciplines to ensure that all project specifications are met and design changes are implemented effectively.
- Develop detailed project schedules, resource plans, and cost estimates, continuously monitoring and adjusting to ensure project milestones are achieved.
- Ensure the procurement of materials, services, and equipment is managed efficiently to maintain smooth project progress.
- Conduct site inspections and assessments, identifying potential risks and implementing corrective actions to maintain project safety and quality.
- Prepare regular progress reports and presentations for stakeholders, providing transparency and keeping clients informed of key developments.

## 🎓 PROFESSIONAL QUALIFICATION

2008 – 2012  
Chennai, India

**BE Civil Engineering**  
Anna University, Chennai, India

## CORE COMPETENCIES

- Civil Engineering Design, Review & Analysis
- Structural Engineering
- Stakeholder & Client Relations
- Health, Safety & Environmental Standards (HSE)
- Project Planning & Execution
- Site Supervision & Inspection
- Contract Negotiation & Management
- Team Leadership & Development
- Budget & Cost Control
- Risk Management & Mitigation
- Quality Assurance & Compliance

## PREVIOUS WORK EXPERIENCE

07/2012 – 04/2015  
Chennai

### **Site Engineer, VR Builders PVT LTD, Chennai**

Key Responsibilities:

Site Management:

- Oversee day-to-day operations at the construction site to ensure work progresses according to the project schedule.
- Coordinate and supervise construction workers, contractors, and subcontractors.

Project Planning & Scheduling:

- Assist in preparing project timelines, ensuring the completion of tasks on time.
- Monitor project milestones and adjust work plans as needed to meet deadlines.

Quality Control:

- Ensure that all construction work is completed according to the specifications, drawings, and industry standards.
- Conduct regular inspections to verify compliance with quality standards.

#### Health and Safety:

- Promote a safe working environment by enforcing safety protocols and conducting regular safety inspections.
- Ensure all workers are trained in safety measures and have access to appropriate protective equipment.

#### Material Management:

- Assist in sourcing and procuring materials and equipment needed for construction activities.
- Maintain inventory records and ensure materials are available on-site as per project requirements.

#### Liaison and Communication:

- Serve as a point of contact for clients, subcontractors, and suppliers.
- Communicate regularly with the project manager to report progress, challenges, and resource needs.

#### Technical Support:

- Provide technical guidance and solutions to any construction challenges that arise.
- Ensure that all engineering calculations and drawings are followed accurately.

#### Documentation:

- Maintain daily reports, including work progress, material usage, and safety issues.
- Ensure proper documentation of permits, inspection reports, and work approvals.

#### Problem-Solving:

- Troubleshoot any technical issues on-site and provide quick, effective solutions.
- Manage any conflicts between workers or subcontractors to maintain smooth workflow.

#### Cost Management:

- Assist in monitoring project costs, ensuring that construction activities stay within budget.
- Evaluate and track variations in the work scope and prepare change orders if necessary.

### IT SKILLS:

- AutoCAD
- MS Office

### DRIVING LICENSE

- DCD Approved Engineer
- SOE card holder
- DM (G+UNLIMITED )Approved Engineer
- Trakhees orange card holder
- Sharjah Approved Engineer holder
- Dubai Unlimited Certificate
