---

### **Education**

- **Bachelor's Degree in Construction Engineering - Arab Academy for Science and Technology (AASTMT)**  
**2014 – 2019, Cairo, Egypt**
- 

### **PROFESSIONAL SUMMARY**

PMP® Certified Senior Civil / Project Engineer with over 6+ years of experience in structural strengthening and post-tension systems, combining strong site execution expertise with project management, planning, cost control, and team leadership. Proven ability to manage multidisciplinary teams, coordinate with clients and consultants, and deliver projects in compliance with quality, safety, schedule, and budget requirements across projects in Saudi Arabia.

### **PROFESSIONAL EXPERIENCE**

#### ***Senior Civil / Project Engineer (PMP®)***

E Solution – Riyadh, Saudi Arabia

2023 – Present

- Manage end-to-end execution of structural strengthening and post-tension projects, ensuring alignment with project plans, schedules, and budgets.
- Lead site engineers, supervisors, and subcontractors while optimizing resource allocation and productivity.
- Develop and monitor project schedules, track progress, and prepare weekly and monthly reports for management and clients.
- Coordinate with clients, consultants, and stakeholders to resolve technical and contractual issues.
- Implement cost control measures, manage variations and change orders, and support claims preparation.
- Ensure full compliance with QA/QC standards and HSE regulations across all project phases.

#### **Technical Office Engineer - E Solution**

***February 2022 – December 2023***

- Assisted in modifying and adapting design plans using Revit and other design software, ensuring they matched actual site conditions.
- Coordinated the complete sequence for post-tension slabs, ensuring material requirements and work schedules were met.
- Prepared detailed design drawings, shop drawings and tension reports for post-tension slabs.
- Prepared the Quantity Surveying of the materials and steel chairs for post-tension slabs.
- Prepared the As-Built shop drawings after executing the construction works in site.

## Site Engineer – Dr Ataby Consultant Office

February 2021- January 2022

- Supervised excavation, foundation, concrete reinforcement, and finishing works.
- Reviewed and ensured the accuracy of shop drawings for the construction process.
- Ensured all on-site activities were aligned with safety protocols and quality standards.
- Inspected contractors work to ensure compliance with approved drawings and standards.
- Performed concrete quality control tests, including slump tests, to ensure the fresh concrete met required workability and consistency standards before casting.
