Civil / Site Engineer with **7+ years of GCC and international experience** in buildings, villas, utilities, and large infrastructure projects. Strong hands-on expertise in **site execution, subcontractor coordination, work inspections (WIR), method statements, quality control, and safety compliance**. Proficient in AutoCAD and MS Office, with proven ability to deliver projects on time and according to specifications. Member of **SCE, ASCE, IAENG, and PMI Community**, committed to international engineering standards.

Experience

SITE ENGINEER, Security Forces Medical Centre (SFMC) PROJECT **CITIC Construction (KSA) | April 2025 – ONGOING**

- Supervised utilities pipeline works including firefighting, water supply, drainage, and electrical conduits.
- Managed trench excavation, pipe bedding, laying, backfilling, pressure testing, and reinstatement as per approved drawings and standards.
- Prepared and implemented method statements, work instructions, and WIRs for site activities.
- Coordinated with Chinese engineers, consultants, and subcontractors to ensure smooth execution.
- Verified construction against approved shop drawings, specifications, and BOQs.
- Conducted site surveying checks (levels, setting out) with survey team using level machine and GPS.
- Prepared daily progress reports, quantity take-offs, manpower reports, and site documentation.
- Ensured QA/QC compliance and strict adherence to HSE requirements.

SITE ENGINEER, QIDDIYA D-13 EARTH WORK PROJECT

Al Jaber Contracting (KSA) | FEB 2024 – March 2025 (Project Base Job)

- Managed cut & fill operations, balancing volumes to optimize resources and minimize waste.
- Supervised heavy equipment operations ensuring safety and productivity.
- Coordinated with surveyors for levels, quantities, and excavation limits.
- Implemented erosion control measures and monitored environmental impacts (dust, noise, vibration).
- Ensured compaction, grading accuracy, and material quality met project specifications.
- Conducted toolbox talks, risk assessments, and safety briefings.

Construction Supervisor, VILLAS PROJECT

Thabat Construction Company (KSA) | JUN 2023 – DEC 2023

- Managed day-to-day site operations for residential villas.
- Supervised structural, precast, and finishing works.
- Coordinated subcontractors and manpower to meet project schedules.
- Conducted regular site inspections for quality and safety compliance.
- Maintained accurate site records, progress reports, and material logs.

SITE ENGINEER, BUILDINGS & RESIDENTIAL

Al-Wabil Contracting (KSA) | JAN 2020 – MAR 2023

- Managed construction of residential and commercial buildings, ensuring timely delivery and adherence to quality standards.
- Supervised site activities, including excavation, foundation work, structural construction, and finishing operations.
- Interpreted and implemented architectural and structural drawings with precision.
- Ensured compliance with safety regulations, building codes, and quality benchmarks through regular site inspections.
- Collaborated with architects, contractors, and consultants to resolve design and construction challenges effectively.
- Prepared project schedules, budgets, and progress reports for stakeholders.
- Coordinated with vendors to procure materials and ensure timely delivery for seamless project execution.
- Monitored material quality, construction techniques, and workmanship to meet project specifications.
- Incorporated sustainable and eco-friendly practices in building design and construction processes.

SITE ENGINEER, VILLAS PROJECTS

Descon Construction | 2017 – 2019

- Supervise the construction of luxury villas, ensuring adherence to design specifications, timelines, and quality standards.
 - Coordinated daily activities of subcontractors, suppliers, and on-site personnel to ensure efficient workflow.
 - Conducted site inspections to monitor progress and compliance with safety regulations.
 - Manage project budgets and resources, minimizing costs while maintaining high-quality output.
 - Collaborated with architects, engineers, and clients to address design changes and resolve construction issues.
 - Prepared detailed reports and documentation for project milestones and regulatory compliance.
 - Worked on various sites overview projects, check work according to drawings, Overview precast work, boundary work.
-

Education

July 2015 – July 2019

Bachelor of Technology, Civil / Preston University, Karachi

Major: Construction Management, Project Management, Soil & Material Testing, Steel Structures

CGPA: 3.8 / 4.0 (A+)

Final Year Project: Steel Structure – High-Rise Building (Burj Khalifa Case Study)

HARD SKILLS

- Site Engineering & Construction supervision
- Utilities & Infrastructure Works
- Earthworks (Cut & Fill)
- Concrete Works & Rebar Inspection
- Work Inspection Requests (WIR)
- Method Statements Preparation
- BOQ & Quantity Take-Offs
- Quality Control (QA/QC)
- Safety Compliance (HSE)
- AutoCAD 2D/3D, Civil 3D
- MS Excel, MS Office

SOFT SKILLS

- Collaboration
- Team Coordination
- Communication Skills
- Problem Solving
- Time Management
- Decision Making
- Attention to Detail
- Site Documentation & Reporting
- Adaptability
- Work Under Pressure
- Subcontractor Coordination
- Team Leadership
- Time Management
- Record-keeping
- Goal Achieving

Activities & Honors

Have **Saudi Council of Engineers Membership (SCE) Membership ID: 1118549**

Have **American Society of Engineers Member (ASCE) — Membership ID: 12590592**

Have **International Association of Engineers (IAENG) — Membership ID: 545471**

Have **Professional Memberships Member — ProjectManagement.com (PMI Community Platform), 2025–Present.**

Have a **KSA Driving License.**

QIDDIYA Approved.

Have Awarded Quality Certificate.

Have Awarded Safety Certificate.

Registered & work permit from **NTC (National Technology Council) issued by Govt of Pakistan in Civil Engineering Technology.**

AutoCAD 2D & 3D Certificate.

Advance Architect (AutoCAD) Certificate.

English language Certificate.

Diploma of Associate Engineer in Civil. Jinnah polytechnic institute (Sindh Technical Board)
