SUMMARY:

I specialize in helping companies establish, communicate, and enforce safety and environmental policies. My expertise includes a diverse range of essential tasks such as statutory compliance, risk and opportunity assessments, and the development of HSE policies and procedures. Additionally, I excel in designing communication and training programs, emergency response planning, and managing hazardous materials. Conducting safety inspections and audits, overseeing contractor safety management, investigating incidents, and executing environmental aspect and impact assessments are also key components of my skill set.
