INDIAN	20-10-1995	MARRIED	inaamulhaq7

OBJECTIVE

Civil Engineer with 8 years of experience in civil and infrastructural projects, specializing in construction supervision, project coordination, and quality assurance. Skilled in managing on-site operations, interpreting engineering drawings, and ensuring compliance with safety and technical standards. Proven ability to collaborate with clients, consultants, and multidisciplinary teams to deliver high-quality and efficient project outcomes.

ROLES & RESPONSIBILITIES

CIVIL ENGINEER

MEDGULF CONSTRUCTION COMPANY WLL (Doha, Qatar) - 2019-PRESENT

Construction Supervision & Site Management

- Oversee and monitor construction activities to ensure the project progresses according to approved drawings and specifications.
- Supervise site work to confirm structures are built correctly and in conformance with engineering scope.
- Inspect construction materials and workmanship to ensure compliance with quality standards.
- Organize and direct site labor and manage the delivery and use of construction materials and equipment.
- Resolve technical issues on-site and modify plans when necessary to address unexpected conditions.
- Maintain the project schedule by tracking progress and identifying any delays.
- Prepare and complete Daily Inspection Reports, photo logs, and as-built records.
- Support the drafting department in producing engineering designs and drawings.

Planning, Design & Documentation

- Review technical reports, calculations, and engineering specifications.
- Calculate quantities for payment, completion estimation, and design purposes.
- Prepare Inspection Requests (IRs), submittals, RFIs, and other quality-related documents.
- Ensure correct implementation of Method Statements (MS) and Inspection & Test Plans (ITPs) during construction.

Client, Consultant & Team Coordination

- Consult with clients and consultants to confirm project requirements and the suitability of sites and plans.
- Attend meetings and provide technical input to project managers, owners, and stakeholders.
- Coordinate multi-disciplinary teams and subcontractors to ensure smooth project execution.
- Assure clear and effective technical communication among project team members.
- Address concerns and issues raised by clients and consultants, especially related to quality and compliance.
- Manage construction support tasks and act as a liaison between contractors and designers.
- Participate in performance evaluations of team members during annual and mid-year reviews.

Quality Assurance & Control

- Determine appropriate construction methods, materials, and quality standards.
- Monitor execution to ensure all construction activities follow approved quality plans and technical requirements.
- Prepare quality documentation and monitor accomplishments to ensure conformity with project specifications.

Health, Safety & Environmental Compliance

- Enforce safety rules and guidelines on construction sites.
- Identify potential hazards and implement necessary preventive measures.
- Conduct regular safety meetings, toolbox talks, training, and audits to promote a safe working environment.

Leadership

- Lead team members by assigning tasks and providing guidance to support project goals.
- Support continuous improvement through mentoring and active team engagement.
