Professional Summary

A Civil Engineer holding a Diploma in Architectural Engineering, with over 11 years of experience in road maintenance projects, construction, and infrastructure works. PMP® certified and trained in planning and control using Primavera P6, with strong expertise in project management, quantity surveying, and technical office work, in addition to extensive experience in road maintenance and field work supervision. Highly proficient in using engineering software and project control tools to achieve optimal results, with solid hands-on experience in supervising project execution and ensuring compliance with specifications and standards. Seeking to join a progressive organization where my skills and experience can be effectively utilized in delivering advanced engineering projects.
