2015

ABOUT ME

Technical Architect & Structural Draftsman specializing in high-fidelity 3D modeling and structural detailing. Highly proficient in AutoCAD, SketchUp, and V-Ray, with a focus on producing accurate blueprints and realistic architectural visualizations. Experienced in professional design at Bench Mark, complex structural drafting at Pyramid Engineering, and field supervision with ZKB Reliable. Committed to technical precision, design excellence, and efficient site coordination.

WORK EXPERIENCE

STRUCTURAL DRAFTSMAN

PYRAMID CONSULTING ENGINEERING SERVICES

August 2024 - January 2025, CANAL VIEW ,
LAHORE

- Provided detailed structural drafting support across a diverse portfolio of projects, including commercial (e.g., HIER FACTORY), residential (e.g., SANA FARM HOUSE), and critical infrastructure (e.g., USA Arthur Kill Road Sewer Line).
- Created precise and comprehensive structural drawings, plans, and sections using AutoCAD in compliance with relevant engineering codes and design specifications.
- Collaborated closely with structural engineers to translate complex calculations and design mandates into accurate, buildable technical drawings, ensuring drafting quality and project efficiency.

ARCHITECT

BENCH MARK

January 2024 - June 2024, QARTABA
CHOWK, LAHORE

- Executed complete 2D and 3D architectural design and drafting services for an international clientele, primarily focusing on complex USA and Australian-based residential and commercial plans.
- Developed detailed drawing sets using AutoCAD and created high-fidelity visualizations and realistic renderings utilizing SketchUp and V-Ray to present design concepts.
- Contributed to the presentation and documentation phase by preparing professional graphic layouts and illustrations using Adobe Illustrator.

Sitesupervisor

ZKB RELIABLE

July 2018 - August 2020, PKLI , DHA Phase 6 ,
Lahore

- Managed day-to-day site operations and supervision for the construction of the Pakistan Kidney and Liver Institute (PKLI) project, ensuring strict adherence to civil engineering plans and safety standards.
- Coordinated effectively with sub-contractors, project managers, and labor teams to maintain project schedule alignment and resolve immediate on-site technical issues.
- Monitored material quality, installation methods, and workmanship to ensure all project phases met the required specifications and quality control benchmarks.
