- Team Motivation

ROLES & RESPONSIBILITIES as a Civil QC Inspector

- Review and interpret project specifications, Quality Control Plans (QCP), Inspection and Test Plans (ITP), Method Statements, and applicable standards (SBC, ASTM, ACI, BS, SASO) to ensure all activities meet quality requirements.
- Conduct inspection of incoming materials such as cement, aggregates, steel reinforcement, concrete, waterproofing, and finishing items to ensure compliance with approved submittals and standards.
- Monitor earthworks including excavation, backfilling, and compaction, and witness field density tests (FDT), California Bearing Ratio (CBR), and Plate Load Tests as per ASTM D698, D1557, and D6938.
- Inspect reinforcement installation, formwork quality, and concrete works including slump testing, temperature checks, sampling, cube making, and curing procedures in compliance with ACI 318 / SBC 304.
- Verify finishing activities such as plastering, blockwork, waterproofing, tiling, painting, and flooring to ensure proper materials, workmanship, and surface finish.
- Inspect structural elements such as foundations, footings, columns, beams, slabs, retaining walls, and ensure correct dimensions, alignment, cover, and level tolerance.
- Review and verify third-party laboratory test results for soil, concrete, asphalt, aggregates, and steel reinforcement to confirm compliance with project requirements.
- Conduct inspection of concrete compressive strength tests, rebar tensile and bend tests, sieve analysis, moisture content, proctor tests, and asphalt core density verification.
- Monitor road and infrastructure activities including subgrade preparation, sub-base, asphalt laying, kerbstone, and interlock installation as per MOT, ASTM, and SBC standards.
- Ensure that all site works are executed in accordance with approved shop drawings, method statements, and inspection and test plans.
- Prepare, maintain, and update QA/QC documentation including Inspection Requests (IRs), Material Inspection Requests (MIRs), Non-Conformance Reports (NCRs), Site Observation Reports (SORs), and test records ensuring traceability.
- Coordinate with site engineers, consultants, and client representatives for inspection scheduling, site walk-downs, and resolving quality issues in a timely manner.
- Participate in internal quality audits, and support the implementation of the company's Quality Management System (QMS) as per ISO 9001 standards.
- Ensure calibration and proper certification of all testing and measuring equipment used for quality inspections.
- Assist in preparing daily, weekly, and monthly QA/QC reports summarizing inspection activities, test results, and quality performance.
- Monitor construction safety and environmental compliance during quality inspection activities.
- Support the QA/QC Engineer and QA/QC Manager in close-out documentation, final handover dossiers, and punch list verification.
- Identify repetitive nonconformities, recommend corrective and preventive actions, and support continuous improvement of quality processes at site.
