Responsibilities:

- **Ensuring construction activities meet project specifications, codes, and standards through inspections, testing, documentation, and reporting of materials (like concrete, steel, soil) and processes (earthworks, concrete pours, waterproofing).**
- **Monitor operations to ensure that they meet production standards. Recommend adjustments to the assembly or production process. Inspect, test, or measure materials. Measure products with calipers, gauges, or micrometers.**
- **Core Responsibilities**
- Site Inspections: Daily checks of excavation, concrete, steel, backfilling, and other civil works for compliance.
- Material Testing: Verifying materials (cement, aggregates, rebar) meet quality standards through lab tests or third-party checks.
- Documentation: Preparing, managing, and archiving Inspection Test Plans (ITPs), reports, test certificates, and non-conformance reports (NCRs).
- Quality Systems: Implementing and monitoring project Quality Assurance/Control Plans and procedures.
- Coordination: Liaising with clients, consultants, and site supervisors on quality issues.
- Reporting: Documenting deficiencies, errors, and corrective actions.
- Working with clients, contractors, Subcon, and local authorities on renovation and new build projects.
- Providing technical assistance to members of a multi-disciplined design team
- Assist With Staging, Testing, and Shipping of Equipment Before Deployment
- Settled project scope including soil improvement, utility clearance, and traffic control.
- Supervised material testing and drilling/compaction activities.
- Supervision of on-site construction leads the junior staff, contractors, and subcontractors.
- Prepared monthly consumption (material, utilities, labor etc.) and daily progress reports. Made necessary adjustments to keep operating costs within the projected range.
- Addresses Request for Information (RFI) from contractors regarding design and construction work.
- Attending regular multi-disciplined meetings to discuss/tackle the project hold points.
- Applies QA/QC requirements to own work and work of the project team.
- Working on all assignments on projects of low to high complexity
- Assessed job tasks to identify potential risks and applied mitigation techniques to improve workplace safety.
- Estimate the needs and costs of equipment and materials in line with project budgets.
