Profile

Fresh graduate Civil Engineer with practical training experience in site supervision, inspections, drawing review, and infrastructure works. Seeking an engineering role to learn, grow, and contribute effectively to project execution and quality improvement.

Professional Experience

Co-op Trainee - Civil Engineering Co-op 06/2024 - 12/2024
Royal Commission for Jubail & Yanbu (RCJY), JCPDI Construction Department - Saudi Arabia
Parsons Corporation (Consultant)

- Worked in the Construction Department under Parsons Corporation, supporting supervision and quality control activities.
- Assisted in supervision of the Sea Water Cooling Project (SWC), including pumping station and pipeline structures.
- Performed site inspections for steel rebar, concrete works (slump, temperature, curing), and finishing activities.
- Conducted soil tests including Dynamic Compaction and Field Density Test (FDT).
- Reviewed IFC and shop drawings for structural and infrastructure works.

Education

Bachelor of Science (BS) in Civil Engineering 08/2020 - 12/2025
Jazan University Jazan, Saudi Arabia

• **Graduation Project:**

Designed a complete water distribution network using EPANET, including demand estimation, hydraulic analysis, and RC design of the pump station chamber.

Skills

Soft Skills

- Problem solving
- Time management
- Attention to detail
- Adaptability
- Critical thinking
- Multitasking Abilities
- Report writing

Hard Skills

- Microsoft Office
- AutoCAD
- civil site supervision
- EPANET
- Reading IFC & shop drawings
- Soil tests (FDT, Dynamic Compaction)
- Concrete tests (Slump, Temp, Crushing)

Languages

Arabic

English
