

Professional Summary

- Dedicated and results-oriented Civil Site Engineer with over 14 years of experience leading and managing construction projects from conception to completion. Proven ability to coordinate multidisciplinary teams and subcontractors to deliver high-quality projects on time and within budget. Skilled in problem-solving, site management, structural systems, and finishing works across residential, commercial, and infrastructure sectors.

Work Experience

concrete plus
From: AUG/2022
To : Present

Project : ORA-Z at New administrative Capital, Egypt
Position : Site manager

Key Responsibilities

- Supervised all construction activities for residential buildings in Zone C3 as per approved drawings and schedules.
- Led a multidisciplinary site team to achieve project goals efficiently.
- Coordinated material requests, procurement, and deliveries to maintain workflow.
- Reviewed subcontractors' performance, progress, and invoices for accuracy.
- Monitored quality, safety, and productivity in compliance with project standards.
- Managed site operations, resolved technical issues, and ensured communication with the head office.
- Assisted in project planning, resource management, and cost control.

Tathmeer properties
From: JAN/2022
To : MAY/2025

Project : Tathmeer (8) and Tathmeer (9) at Muscat, Oman
Position : Team leader Engineer

Key Responsibilities

- Supervised scaffolding installation for structural and façade works in compliance with safety standards.
- Prepared BOQs and verified subcontractor quantities.
- Oversaw all finishing works including flooring, painting, gypsum partitions, doors, windows, HVAC, plumbing, and handrails.
- Ensured full compliance with PACDA fire protection requirements

Various projects in Egypt and Oman
From: FEB/2020
To : DEC/2021

Project : Various companies and consulting offices
Position: Freelance civil engineer (during the covid-19 pandemic)

Key Responsibilities

- Managed small to medium-scale residential and commercial construction projects.
- Prepared structural designs, BOQs, and supervised remote execution through coordination with local contractors.
- Collaborated directly with clients to resolve design and site-related issues promptly and effectively.
- Ensured project progress despite pandemic-related restrictions by adapting workflows and remote communication

Rowad Modern Engineering (RME)
From: JUL/2017
To : DEC/2019

(1) Project : 500/220/22 KV GIS substation at Beni Suef city, Egypt
Position : Senior Civil Site Engineer from JUL/2017 to DEC/2018

Key Achievements

- Delivered the full project lifecycle from excavation to handover with 95% client satisfaction.
- Resolved design and execution conflicts through coordination with MEP teams and GE.
- Managed multiple subcontractors, resolving technical issues and maintaining workflow efficiency

Key Responsibilities

- Supervised RC and finishing works for control buildings, gantries, firefighting rooms, guard towers, and cable ducts.
- Managed blockwork, plastering, painting, flooring, and ceiling installations as per project specifications.
- Oversaw installation of doors, windows, handrails, stairs, ramps, and access steps.
- Directed application of epoxy, insulation, and waterproofing systems.
- Supervised fabrication and installation of galvanized steel structures, gratings, and fire-rated doors.
- Managed slab-on-grade (SOG) concrete works and curb stone installation.
- Directed construction of internal and heavy-duty transformer roads, including steel rail installation

(2) Project : R5 project (New garden city) at New Administrative Capital, Egypt
Position : Senior Civil Site Engineer from JUL/2018 to DEC/2019

Key Achievements

- Led and coordinated a multidisciplinary team (4 Engineers and 5 Supervisors), improving project efficiency and overall performance.
- Delivered the mock-up cluster ahead of schedule, enhancing client satisfaction and supporting marketing goals.
- Conducted regular site inspections, resolving technical issues proactively to prevent delays.
- Maintained a zero-incident safety record throughout project execution

Key Responsibilities

- Supervised implementation of post-tension slabs and related structural works.
- Oversaw masonry, fire-rated assemblies, plastering, and internal/external painting.
- Directed installation of various flooring systems as per project specifications.
- Managed fitting of fire-rated wooden doors, aluminum doors, and windows.
- Supervised installation of stainless steel handrails for staircases and balconies.
- Led installation of gypsum boards, MDF panels, GRG, and GRC for entrances and façades.
- Managed cement and external insulation works in bathrooms, kitchens, and balconies

International group for contracting (IGC)

From: FEB/2016
To : JUL/2017

Project : Air navigation compound at Cairo, Egypt
Position: Senior Civil Site Engineer

*****Key Achievements*****

- Promoted to a senior role within one month for demonstrated leadership and efficiency.
- Led a technical team in a multi-phase, multi-structure project, meeting all delivery milestones.
- Oversaw major civil works and received consultant recognition for project excellence

*****Key Responsibilities*****

- Managed casting of all structural elements from foundations to roofs per approved drawings and specifications.
- Supervised masonry with lightweight blocks (L.W.B.), plus internal and external plastering and painting.
- Directed cement and moisture insulation works for underground tanks and external surfaces.
- Oversaw casting of retaining walls and installation of decorative wrought iron (ferforje) fences

AL Wataniya group for Awqaf Investments

From: SEP/2012
To : FEB/2016

Project : Tebah gardens compound, 6 October city, Egypt
Position: Junior Civil Site Engineer

*****Key Achievements*****

- Progressed from managing concrete works (5 buildings) to full-site execution (15 buildings), later promoted to lead landscaping and basement works for 50 buildings.
- Delivered Stage 2 concrete works with team recognition for quality and efficiency.
- Ensured full structural compliance and concrete quality control across 40 buildings.
- Oversaw excavation, structure, and finishing works for 15 buildings within schedule and budget

*****Key Responsibilities*****

- Supervised all concrete works from excavation to roof slab casting.
- Managed masonry, plastering, and external painting of fences for 50 buildings.
- Directed installation of Hashmi stone cladding and decorative ferforje fencing.
- Oversaw curbstone placement and interlock paving for sidewalks and access roads.
- Managed basement slab and ramp concrete works, including hardener finishing.
- Ensured waterproofing of retaining walls and installation of steel gates and handrails

Ghanem consulting office

From: JUL/2011
To : SEP/2012

Project : Residential buildings and Mosques at Mansoura city, Egypt
Position: Junior Civil Engineer

*****Key Achievements*****

- Worked on mosques, residential buildings, and charity centers post-graduation.
- Participated in site supervision and design (AutoCAD/SAP2000).
- Completed intensive 3-month training and gained early recognition.
- Contributed to civil and architectural design accuracy.

*****Key Responsibilities*****

- Supervised concrete works, masonry, and all finishing works for various projects.
- Managed excavation and soil replacement, and oversaw the execution of concrete works.
- Supervised plastering, painting, and marble flooring/wall installation.
- Oversaw the installation of wooden doors and windows.
- Assisted in quantity surveying (QS), prepared reports, and supported project documentation.

Education

- Bachelor of Engineering in Civil Engineering
- Mansoura University, Egypt (2011)

language

- Arabic: Native
- English: Intermediate (Currently improving)

Software skills

- **AutoCAD (2D)** – Advanced
- **SAP2000** – Advanced
- **ETABS, SAFE and CSI COLUMN** – Intermediate
- **Microsoft Office (Word, Excel, PowerPoint)** – Advanced

Management & Site Skills

- Project Management & Site Supervision
- Team Leadership & Resource Allocation
- Budgeting & Scheduling
- Quality Control & HSE Compliance
- Problem Solving & Conflict Resolution

Technical Expertise

- Proficient in post-tension slabs and reinforced concrete structures.
- Delivered construction elements to high accuracy, as per design specs.
- Applied epoxy, cement, thermal, and moisture insulation effectively.
- Supervised chequer plates, grating, fan supports, and transformer rails.
- Used GRC, GRG, MDF for façade and architectural finishing.
- Ensured integration between structural, MEP, and finishing systems.
