Designation QS/Land Surveyor/Site Supervisor,

Project Free Zone Jebel Ali (PZ447), Jumeirah Triangle, Sport City.

Location United Arab Emirates. UAE

Company Ghantoot Transport & General Contracting L.LC

Duration 08/2007 - 04/2009

Designation Land Surveyor/Site Engineer,

Responsibility

- Ensure compliance with quality control standards and procedures on civil construction projects.
- Assessed standards against agreed measures to achieve quality assurance.
- Coordinate with project managers, engineers, and subcontractors to resolve any quality-related issues or concerns.
- Prepare and submit comprehensive reports documenting quality control activities and findings.
- Conduct training sessions for construction crews to promote understanding and adherence to quality control procedures.
- Submitted all procedures and calculations to client for review and approval.
- Organized, managed and tracked entire submittal review process to facilitate timely review and approval.
- Produced deliverables on time to customer specifications, clarifying requirements and finding solutions.
- Analyzed effects and significance of project noise and waste to minimize impacts on environment.
- Worked flexibly to meet varying site and project requirements.
- Resolved unexpected technical difficulties and communicated solutions with clients and representatives.
- Assessed standards against agreed measures to achieve quality assurance.
- Coordinated engineers and construction professionals to meet varied project demands.
- Generated reports detailing site activities, incidents and resolutions.
- Answered technical concerns and devised solutions to resolve site and engineering problems.
- Researched, surveyed and inspected sites to review and improve construction plans.
- Rectified engineering errors and faults quickly to meet project KPIs.
- Worked flexibly to meet varying site and project requirements.
- Developed and implemented improved database tools to estimate project scopes and costs.
- Supervise and inspect civil construction activities to ensure adherence to specifications and safety protocols.
- Conduct regular inspections of materials and workmanship to identify and rectify any deficiencies.
- Review and interpret project plans, drawings, and specifications to ensure accuracy and compliance.
- Monitor and enforce compliance with environmental regulations and sustainable construction practices.
- Stay current with industry standards and best practices in civil construction quality control.
- Generated reports detailing site activities, incidents and resolutions.
- Answered technical concerns and devised solutions to resolve site and engineering problems.
- Guided projects to meet timescales, budgets and agreed specifications.
- Resolved unexpected technical difficulties and communicated solutions with clients and representatives.
- Undertook engineering system quality assessments to confirm specifications to best practice requirements.
- Worked with project manager to create clear and concise RFIs.
- Obtained permits to avoid disruption in project schedule.

- Collaborated with project manager and superintendent to identify critical long-lead items and develop project procurement schedules.
- Supported in anticipating any potential project risks, identifying and establishing corrective actions.
- Resolving construction problems and delays.
- Communicating with clients, contractors, and other stakeholders.
- Keeping records of construction activities.
- Ensuring that construction projects comply with all applicable laws and regulations.
- Worked flexibly to meet varying site and project requirements.
- Procuring materials and equipment.
- Overseeing the commissioning and handover of completed projects
- Making reports on different activity at site related issues.
- Daily Progress meeting and management of all site personnel
- Coordinate with the other departments to work out the exact quantities of material required.

ISO 9001:2015 - Quality Management System (QMS)

[Score: 88]

Course Details

This free online Quality Management System course provides a comprehensive guide to the latest ISO 9001:2015 standard. To begin, the course will discuss the history of ISO 9001 Revisions as well as clarify and describe common misconceptions about this revision. It will also teach you how to examine and manage the context of an organization. You will learn about the Process Approach and Risk-Based Thinking as well as each phase of the Plan, Do, Check, and Act Cycle. You will also be shown how to recognize the importance of managing organizational knowledge and how it can be preserved.

Next, you will learn how companies check their management system through internal audits and why top management should be involved in Management System through management reviews. You will also get the chance to compare what has changed from the previous version (ISO 9001:2008) to the new version (ISO 9001:2015) regarding management reviews. You will understand the complex quality management principles used in the standard with the help of simple examples and easy to use applications.
