Job Task / Key Accountabilities

- Implementing environmental and sustainability awareness through environmental inductions, trainings, drills, and clear site signages.
- Preparing CESMP (Construction Environmental & Social Management Plan) documents and securing client approval.
- Developing site-specific plans including Waste Management Plan, Dust Management Plan, Traffic Management Plan, Workers Welfare Plan, Spill Response Plan and preparing comprehensive Environmental Emergency Response Plans.
- Performing environmental inspections and audits to verify compliance, detect deviations, and assess risks impacting the environment and sustainable operations.
- Identifying and implementing mandatory control measures.
- Defining control measures to mitigate environmental impacts and risks related to transport and logistics.
- Reporting environmental and sustainability incidents to management, including spills, releases, potential permit non-compliances, and upcoming regulatory inspections.
- Monitoring and recording dust emissions visually and through handheld particulate monitors (Dust Mate) to ensure compliance with environmental and air quality goals.
- Daily visual observations of dark/black emissions from machinery to manage air quality and reduce carbon footprint.
- Reporting, recording, and tracking environmental non-compliances, and implementing effective corrective actions.
- Coordinating with various agencies, preparing documentation, scheduling required testing, and providing follow-up to ensure compliance with environmental and sustainability requirements.
- Managing and controlling Solid Waste with an emphasis on waste minimization, recycling, and sustainable disposal.
- Evaluating corrective and preventive actions for sustainability effectiveness.
- Engaging with external stakeholders (clients and authorities) on issues related to environmental protection and sustainable development.

Areas Of Expertise/Skills

Environmental & Sustainability Knowledge and Skills:

- Provides communication and training to site management to ensure all levels of plant personnel understand their roles and responsibilities in identifying, addressing, and resolving environmental related issues.
- Proficient in developing CESMPs based on ESIA requirements and well-versed in SEC and NEOM Environmental and Sustainability standards
- Skilled in planning, coordination, implementation, clearance, and compliance processes, with hands-on experience conducting environmental inspections, identifying issues, and developing corrective action plans to meet regulatory objectives.
- Capable of recognizing environmental aspects and impacts and establishing procedures aimed at minimizing adverse effects and supporting site operations.

Management Skills:

- Creating effective reports, performance charts and Statistics.
- Budget planning and cost control for departmental operations.
- Conducting regular team meetings and performance reviews.
- Ensuring compliance with company policies and industry standards
- Mentoring and training junior staff to build capability and succession.
- Ability to establish and maintain good relationships with clients.
- Dealing with clients directly & meeting with them with regular intervals.
- Strong communication skills.
- Excellent team and time management.
- Driving continuous improvement initiatives in processes and systems.
