Al-Falah Contracting Co.

Site Engineer – Road Maintenance (Performance-Based Contract)

Arras – Al-Nabhaniyah Roads Maintenance Contract No. 505, Al-Qassim Region

- Worked as a Site Engineer under a Performance-Based Road Maintenance Contract, utilizing IBM Maximo as the asset and maintenance management system.
- Conducted daily monitoring of Performance Scorecards (KPIs) and verified the consultant's compliance with approved technical specifications through continuous field inspections.
- Prepared and managed regular maintenance schedules using Primavera P6, and implemented them on the Maximo platform.
- Prepared corrective maintenance programs through IBM Maximo.
- Prepared, issued, and followed up Work Orders (WOs) as per contract requirements, from submission through approval on Maximo.
- Planned and allocated maintenance teams (regular, corrective, safety inspection, and cleaning patrols) in accordance with approved schedules and routes.
- Followed up, addressed, and closed Non-Conformance Reports (NCRs) issued by the consultant or safety inspection teams.
- Supervised and monitored traffic safety works at work sites to ensure compliance with safety standards.
- Conducted asset inventory, quantity take-offs, and field inspections of roads, including condition assessment and evaluation.
- Supervised and monitored road maintenance works on site, ensuring quality and adherence to specifications.
- Prepared and submitted monthly Invoices and followed up on their approval by the consultant.
- Monitored regular maintenance activities on site and verified compliance with the approved maintenance program.
- Monitored corrective maintenance activities on site and ensured alignment with the approved corrective schedules.
- Followed up on the execution and closure of Work Orders at site.
