

Adi Moshawah Alaslami

+966503822616 | adialshammari8@gmail.com | Riyadh, Saudi Arabia

Professional Summary

Civil Engineer with a Master's Degree in **Project Management** and extensive experience in quality control, materials engineering, and transportation projects. Adept at managing large-scale civil engineering projects from concept to completion, ensuring adherence to industry standards, regulatory guidelines, and project timelines. Excellent communication skills in English, with the ability to facilitate clear and effective communication with clients, consultants, and stakeholders. Committed to ensuring adherence to standards, enhancing safety, and delivering high-quality, durable solutions that optimize project efficiency and performance.

Education

Midocean University, Fujairah, United Arab Emirates

2023

- Master's Degree in Project Management.

Indiana State University, Indiana, United States

2019

- Bachelor's Degree in Civil Engineering (Minor in Transportation Engineering).

Experience

Fallow UP project Aied Dahim Al Hamoud & Partners Contracting Company, Saudi Arabia

Feb 2025 – Present

- Supervised construction activities, ensuring timely completion of tasks while adhering to project specifications and deadlines.
- Monitoring the progress of projects and following up on implementation from a technical and administrative.

Materials Engineer and Quality Controller, Ministry of Transport and Logistic Services, Saudi Arabia

Nov 2021 – Feb 2025

- Oversee project execution, ensuring adherence to established quality control standards and regulatory guidelines throughout.
- Monitor and evaluate quality control processes, suggesting adjustments to improve performance and maintain quality levels.
- Identify areas for improvement in quality management processes, proposing innovative solutions for enhanced effectiveness.
- Prepare detailed quality control reports, highlighting key issues, quality levels, and corrective measures for improvement.
- Conduct material inspections to ensure adherence to project standards and specifications across various project phases.
- Analyze test data to assess material performance, providing recommendations for improvements and project enhancements.
- Ensure proper material storage and handling to maintain integrity, effectively reducing risks of damage or degradation.
- Prepare risk assessments related to material usage, identifying potential issues and proposing effective mitigation strategies.

Site Engineer, Aied Dahim Al Hamoud & Partners Contracting Company, Saudi Arabia

Sep 2020 – Nov 2021

- Conducted site surveys, analyzed data, and implemented design plans to improve intersections and connectivity in Riyadh.
- Monitored safety protocols at the construction site, ensuring adherence to regulations to minimize accidents and risks.
- Inspected construction work at different stages, ensuring quality standards were met and addressing any deficiencies.
- Supervised construction activities, ensuring timely completion of tasks while adhering to project specifications and deadlines.

Development Engineer, Euro Consult For Engineering Consultancy, Saudi Arabia

Jun 2019 – Sep 2020

- Developed engineering designs and plans for projects, ensuring adherence to regulatory standards and best practices.
- Provided technical support during the design phase, ensuring alignment with client requirements and industry standards.
- Led a traffic safety project for 3 months, ensuring strict adherence to safety standards, and delivering project milestones.
- Analyzed traffic data to assess safety risks, proposing engineering solutions to enhance road safety and reduce accidents.
- Liaised with local authorities to secure necessary permits, ensuring legal adherence and uninterrupted progress of the project.

Technical Skills

- **Project Management** | Adept in managing project timelines, resources, and teams to ensure successful project completion.

- **Quality Control** | Skilled in implementing quality control processes to ensure adherence to project standards and specifications.
- **Traffic Safety** | Knowledgeable in designing traffic safety measures and overseeing their implementation to reduce accidents.
- **Site Supervision** | Capable of supervising on-site activities, ensuring timely completion and adherence to safety standards.
- **Road Materials** | Adept in selecting, testing, and analyzing materials to ensure durability, safety, and adherence to standards.
- **AutoCAD** | Competent in AutoCAD for creating engineering drawings, layouts, and technical documentation for projects.
- **Technical Communication** | Efficient in using English for technical communication, ensuring precision and overall clarity.
- **Microsoft Office** | Skilled in Microsoft Office (Word, Excel, PowerPoint) for documentation, reporting, and communication.

Personal Skills

- Effective Communication
- Civil Project Planning
- Performance Evaluation
- Consistent Monitoring
- Progress Reporting
- System Approach
- Strategic Thinking
- Decision-making
- Task Delegation

Memberships

- **Member** | American Society of Civil Engineers (ASCE)
- **Participant** | American Society of Highway Engineers (ASHE)

Languages

- Arabic (**Native**), English (Excellent).
