DAE (CIVIL)

EMPLOYMENT EXPERIENCE

LAND SURVEYOR

Feb 2022 – Mar 2025

PORR Qatar Construction W.L.L

Responsibilities:

1. Establishing main control point at distance of 5km of global positioning system and running a traverse between G.P.S point by total station, establishing permanent benchmarks at frequent intervals and also connecting traverse points.
2. Collection of all data of details along the road including L/S and C/S for designee purpose using total station.
3. Transferring all the stored data to the P.C from total station, which will be N.E.Z format and can be plotted in Auto Cad.
4. Analyzing the designee data of purposed C/L data of horizontal and vertical Curves, Traffics islands and median by calculations and through geometry in P.C.
5. Fixing the C/L of purposed Road on the ground, marking the locations of bridges, culverts and setting out of horizontal, verticals curves with H.I.P and P.V.I
6. Full time of execution of all survey work in the site when construction started fixing alignments establishing peg levels at edges and centers.
7. Carrying out inspection with consultants at every stage of executions like sub grade, subbase, base course and wearing coat.
8. Carrying out as built survey of constructed roads and calculating the quantity of work for building.
9. Conducting special survey for major water body crossing like river, creek and canals to get hydrographical data like L/S C/S and H.F.L.

LAND SURVEYOR

2020 FEB – JAN 2022

BAHRIA TOWN Islamabad

Responsibilities:

1. Measure land features, such as depth and shape, using reference points.
2. Taking measurements of distances and angles on a property or section of land in order to establish legal boundaries.
3. Provide guidance and support to field staff or junior surveyors and estimators.

4. Creating records of survey results.
5. Examine previous land records to verify data from on-site surveys.
6. Performing mathematical calculations to determine and confirm surveying measurements.
7. Employing specialized equipment, including distance measuring wheels, Total Station, and geographic information system (GIS) devices to measure boundaries and contours.
8. Marking and delineating boundaries and reference points on a property or section of land.
9. Analyzing data using plans, maps, charts, and software such as AutoCAD and GIS programs.
10. Presenting data to clients and preparing reports detailing legal boundaries and other relevant information.
11. Reviews survey requests and determine the type and method of survey required and schedules and assigns work to subordinate staff.
12. Develop and implement improvements in survey methods, new techniques, procedures and equipment.
13. Creating records of survey results

AREA OF EXPERTIES

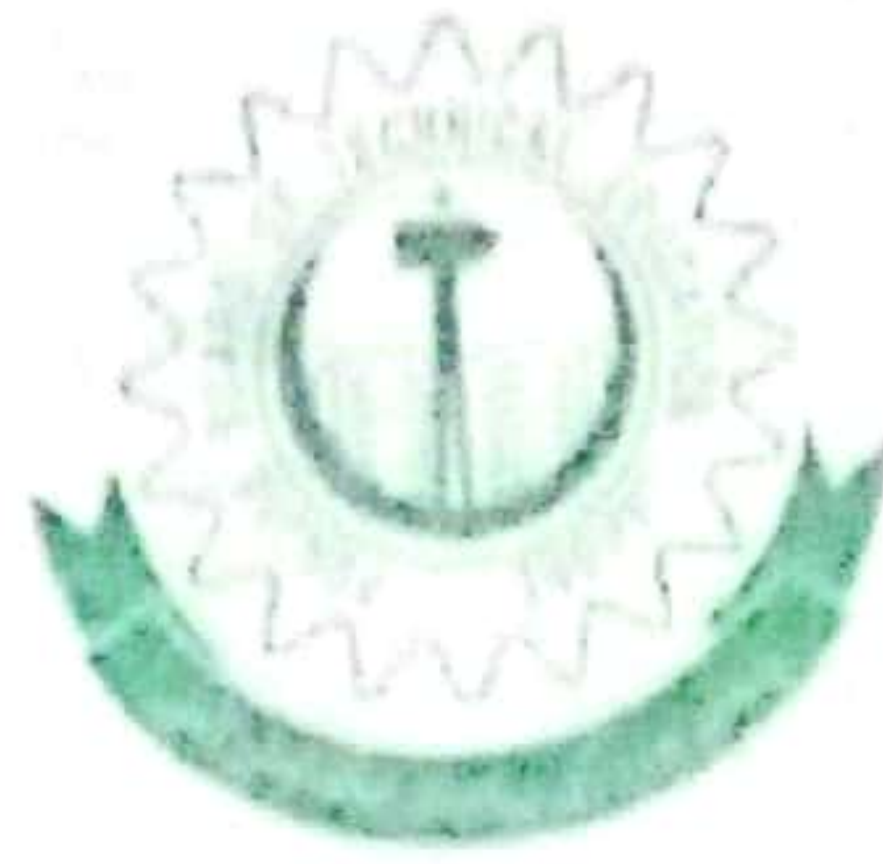

Measure land features, such as depth and shape, based on reference points. Examine previous land records to verify data from onsite surveys. Prepare maps and reports, and present results to clients.
