~Work at Height Activity: Fall Protection Systems:

Ensure that fall protection systems are in place, including guardrails, safety nets, or personal fall arrest systems (harnesses and lanyards).

Access and Egress: Ensure safe access and egress to elevated work areas, such as ladders, scaffolds, or elevated platforms, are in place and stable.

Tool and Material Handling: Ensure tools and materials used at height are secured to prevent them from falling and causing injuries.

~Excavation Activity:

Access and Egress: Ensure there are safe means of entry and exit from the excavation site, such as ladders, ramps, or steps.

Weather Considerations: Monitor weather conditions, particularly rainfall, which can increase the risk of trench collapses. Suspend work during hazardous weather conditions.
