Professional Summary

A Civil Engineer with over 4 years of experience in infrastructure and construction projects. Holds a Bachelor's degree in Civil Engineering and Geomatics Engineering from King Saud University. Participated in large-scale national projects aligned with Saudi Vision 2030, including Road, Strategic Water Tanks, Pipeline and Sewage network, and contributed to delivering them ahead of schedule. Skilled in project management, field supervision, quality assurance, risk analysis, and coordination with government entities, suppliers, and contractors. Seeks to contribute to high-impact projects by applying technical knowledge and ensuring top standards of quality and safety within the planned timeline.

Education

- **B.Sc. in Civil Engineering and Surveying Engineering** | King Saud University – Riyadh | Graduation Year: 2020

Professional Experience

AlAyuni Investment & Contracting Company | Civil Infrastructure Engineer – Strategic Water Tanks Project – Makkah Nov 2024 – Present

- Conducting technical studies and cost estimations
- Planning and executing fieldwork for water tanks and pipelines
- Managing teams and contractors, and coordinating with relevant authorities
- Implementing quality and safety standards, conducting material inspections and tests
- Preparing regular progress reports and ensuring adherence to schedule

AlAyuni Investment & Contracting Company | Civil Infrastructure Engineer – Amaala Infrastructure Project Tabuk Region | Mar 2023 – Oct 2024

- Supervising installation of water and sewage networks and treatment plants
- Coordinating with government entities and utility companies
- Preparing daily progress reports and performance analysis
- Monitoring material quality and compliance with technical specifications
- Enforcing health and safety regulations on-site

AlAyuni Investment & Contracting Company | Civil Engineer – Gulf of Aqaba South Road Project – NEOM Aug 2021 – Mar 2023

- Overseeing construction activities including excavation, filling, and asphaltting
- Conducting soil and material tests
- Managing schedule and administrative coordination, delivering project 3 months ahead of deadline
- Enforcing quality and safety standards throughout all phases
- Preparing comprehensive progress reports

Royal Commission for Jubail and Yanbu | Trainee Project Engineer – Yanbu | Oct 2020 – Dec 2020

- Preparing quality, risk, and cost reports
- Coordinating with clients and contractors and tracking project progress
- Ensuring compliance with engineering regulations and standards
- Identifying engineering issues and proposing practical solutions
- Monitoring safety and quality and recommending improvements

Projects

- **RED SEA GLOBAL (Amaala Triple Bay Primary Infrastructure Work Projects):** Oversaw the construction of a water pump station from layout to final commissioning within resources and timeline
- **NEOM (Gulf of Agaba South Road Project):** Ensured efficient equipment utilization and quality execution through materials control and on-site productivity

Skills

Technical Skills: AutoCAD – Civil 3D – Microsoft Office – Project Management – Shop Drawing Preparation – Quantity Surveying – Quality Control – Surveying Tools – Reviewing Engineering Documents – Reading Architectural & Mechanical Drawings – Water & Sewage Network Design – Quantity Estimation Software – GIS

Professional Skills: Site Supervision – Technical Reporting – Project Planning & Execution – Risk Analysis – Budget Control – Quality & Safety Monitoring – Contractor Technical Evaluation – Government Coordination – Material Testing – Utility Network Implementation – Quality Compliance – On-time Project Delivery

Soft Skills: Time Management – Effective Communication – Problem Solving – Analytical Thinking – Organization – Monitoring & Evaluation – Flexibility – Working Under Pressure – Team Collaboration – Attention to Detail – Commitment
