PROFILE

Civil Engineer with proven expertise in delivering safe, efficient, and high-quality construction projects. Skilled in managing site operations, supervising teams, and coordinating with multidisciplinary professionals across all project phases. Adept at problem-solving, multitasking, and ensuring compliance with safety and quality standards. Strong ability to perform under pressure and drive projects to successful completion within time and budget constraints.

EXPERIENCE HISTORY

Senior Site Engineer

Apr 2025 - Present

EAVE Group, Riyadh

- Led site supervision for multiple high-profile residential and commercial projects, ensuring compliance with structural design and safety standards.
- Managed on-site coordination between contractors, suppliers, and project managers to streamline workflow and mitigate delays.
- Implemented quality control protocols for concrete works and reinforcement placement, improving project durability and safety.
- Utilized project management software to monitor scheduling, resource allocation, and site progress, ensuring projects stayed within budget and timeline.
- Trained and supervised junior engineers and site staff, fostering a collaborative environment focused on continuous improvement and adherence to engineering best practices.
- Conducted regular inspections and risk assessments to identify and resolve site issues promptly, reducing project downtime.

Site Engineer / Project Control Engineer

Dec 2023 - Mar 2025

Over Company L.L.C, Riyadh

- Supervised execution works with a focus on steel structures, from fabrication stages to on-site installation and final handover to the client with the highest quality standards.
- Oversaw concrete, roads, and infrastructure works while coordinating and organizing project activities.
- Additionally served as a Project Control Engineer, responsible for project pricing, preparing and monitoring schedules, cost control, and supervising procurement processes to ensure timely and efficient project delivery.
- Gained extensive on-site experience working on major projects across **Riyadh, NEOM, Tabuk, and An Nairyah**.

Site Engineer

Sep 2020 - Sep 2023

At Concrete Plus For Engineering and Construction, New Cairo

Role : Worked on lots of project with serval Types of Structural Systems and management :

- **Zed East (ORADevelopment) :**

fully finish project of 66 Villas and 11 Residential Buildings

- **MIVIDA (EMAAR MISR) :**

Fast Track Project with two Clubhouse buildings and two mosques

(RC works , Fully finish and infrastructure)

- **90 Avenue (TABARAK Development) :**Rc and Block works 10 Residential Buildings with different structural systems

(Post tension and Flat Slab)

Structural Design Engineer

Mar 2020 - Sep 2020

At Image Consulting Bureau, Cairo

Role: Structural design, quantity surveying and shop drawing:

- Structural Analysis And design With programs
- Quantity Survey for Structural elements (Concrete and RFT)

Infrastructure Site Engineer

Sep 2019 - Mar 2020

At Fiber Misr Systems, Elminya

Role : drilling and concrete works

- Railway Project : working in drilling trenches and manholes for Electrical cables

EDUCATION

Bachelor's of Civil Engineering

Zagazig university

Grade : Good

Graduation Project :

Structural Design Analysis For with programs

Graduation Project Grade : **Excellent**

divided into three parts

- 1- Design of high-rise building about 15 Floor using in analysis and outputs results : (**Safe , Etabs and autocad**)
- 2- Simulation of earthquake resistance model in high-rise buildings
- 3- Design of sport stadium with its stands and swimming pool
Using in analysis and outputs results (**SAP2000 and Autocad**)

Sep 2014 - Aug 2019

SKILLS

Personal Skills :

- Strong problem-solving and decision-making abilities
- Effective public speaking and communication skills
- Time and cost management expertise
- Skilled in negotiation and conflict resolution
- Ability to work under pressure and meet deadlines
- Responsible, reliable, and proactive in handling tasks

Technical Skills:

- Proficient in engineering software: **SAP2000, SAFE, ETABS**
- Skilled in **AutoCAD** and **ASD**
- Project planning and scheduling using **Primavera P6**
- Strong knowledge of **Microsoft Office** applications
- Solid understanding of **site supervision, technical office activities, and project management**

COURSES

Hesham Tarek

Structural Design and Analysis with Programs

Aug 2018

Ahmed Hassan

Technical Office and Planning Principles

Jul 2019

Mohamed Elbahrawy

Shop drawing and Qs For RFT and Concrete Dimensions

Jul 2020

Ali Katary

Planning, Scheduling and Reporting Using Primavera P6 (PSR)

Nov 2023
