PROFESSIONAL SUMMARY

Architectural engineer / Urban Design and Planning

Mastered the branches of this specialization and sought it to develop and plan cities. This is done through the application of the element of sustainability with all its requirements, and transfer of these concepts in the implementation of projects through companies and university students. This to install the idea of modern cities with a focus on meeting all the needs of the work team to achieve the goals of the project with preserving the foundations and standards for designing and planning cities, and showing this success in a complete and integrated way to raise the level of engineering companies and educational platforms, so always make sure to use programs that show designs in a way that tends to the truth and realism for the beneficiaries of these projects.

WORK HISTORY

Senior Architect designer, 08/2015 - 09/2022

1-Sanan promoting investment and business. - Khartoum, Sudan

The Director
Turkiye Scholarships Burslari
Turkey

Dear Sir/Ms.:

It gives me great pleasure to write this letter in support of **Ms. Leena M. Y. Alnour** who is applying for a scholarship and for admission to one of your esteemed Ph.D. Programs.

I have known her for about four years as a student in my master's classes and urban design studios. During the two years she spent in our school as a postgraduate student, Ms. Alnour was consistently an excellent student who graduated with a 77.46% overall percentage and a 'Very Good' classification.

Ms. Alnour is intelligent, highly dedicated to her career and always excels in her work. She has an amiable character and works well within a team. She is an astute researcher who poses perceptive questions and proposes creative research methods to arrive at convincing conclusions.

I wholeheartedly support her application as I am fully convinced that she will excel and perform well in the Ph.D. program; and that she will be an excellent addition to your research groups. In these difficult times in our country where young professional females are at a greater disadvantage, she deserves every support you could offer her.

Sincerely yours,

Gamal M. Hamid, Ph.D.

B.Sc. Arch. (Uni. of Khartoum); S.M.Arch.S. (M.I.T.); Ph.D. Urb. Plan. (U.C. L. A.)
Associate Professor and former Dean,

Date: June, 22nd. 2025

Letter of Recommendation for Ms. Leena Muneer Yousif Alnour

To Whom It May Concern,

It is with great enthusiasm that I recommend and support *Leena Muneer* in her pursuit for a scholarship and admission for a Ph.D. program abroad. I had the particular opportunity to assist her during her M.Sc. study in urban design at the Faculty of Architecture, UofK. Throughout her stay and research, she demonstrated excellent academic abilities, strong commitment, and outstanding critical thinking skills.

In addition to her strong academic abilities, Ms. Leena is a creative, dedicated, and hardworking personnel. She performed exceptionally well in group projects, contributing ideas and fostering a positive working dynamic among her peers. Her participation in several initiatives including the class seminars also highlights her proactive approach to learning and her commitment to expanding her knowledge beyond the classroom.

Based on her background in Architecture, excellent academic performance, strong research skills, and interest in urban studies, I am confident that Ms. Leena Muneer will thrive in your PhD program.

Due to the turbulent situation in Sudan these days, it is difficult to issue her a detailed certificate of subjects, you can find attached the curriculum of the course, hoping to be able to restore the case of issuing detailed certificates as soon as possible.

For any further information, please do not hesitate to contact.

Sincerely,

Salah Mahmoud Osman,
Associate Professor Dr.
Dean, Faculty of Architecture
