✉ omarrifat12@gmail.com 📞 0590287063 📍 Al Olaya, Riyadh, Saudi Arabia

## PROFILE

---

Delivery-focused **Civil Engineer** with 2 years of hands-on experience in **site execution and on-site supervision** across **building** projects. Strong in **subcontractor coordination, daily site follow-up, inspections, snagging, and progress reporting**, with consistent focus on **quality, safety (HSE), and schedule**. Proven ability to coordinate with **contractors, consultants, and suppliers** to resolve site issues quickly and support **on-time delivery**.

## EDUCATION

---

[2018–2023]: **B.Sc. in Civil Engineering from Canadian International College(CIC)**

## PROFESSIONAL EXPERIENCE

---

**FGCC – Diriyah Project, Riyadh, Saudi Arabia** 06/2025 – Present

- Supervise on-site construction activities to ensure compliance with project specifications, HSE standards, and quality requirements.
- Conduct regular site inspections to monitor progress, identify issues, and coordinate with contractors and consultants for timely resolution.
- Prepare daily/weekly site reports, verify material quality, and ensure execution follows approved drawings and project schedules.
- Prepare Bar Bending Schedules (BBS) from structural drawings to calculate reinforcement quantities and support site execution.
- Work hands-on with DOKA and PERI formwork and scaffolding systems, overseeing installation, alignment, stripping, and coordination to ensure safe and efficient concrete works.

**ABV Rock Group. KSA, Riyadh** 04/2025 – 05/2025

- Supported site inspections and progress reporting for structural works to ensure alignment with drawings, specifications, and safety requirements.
- Assisted with project execution follow-up and contractor coordination to maintain schedule and resolve site issues efficiently.

**Al-Bostany Construction, New Cairo, Egypt** 12/2024 – 03/2025

- Supervised on-site operations to ensure compliance with approved drawings, project specifications, and HSE regulations.
- Assisted with BOQ preparation, quantity takeoff, and schedule updates (weekly look-ahead and progress tracking).
- Supported material procurement planning by preparing material requests, verifying quantities, and coordinating deliveries to site.
- Coordinated subcontractors, suppliers, and site teams to maintain workflow continuity and meet project milestones.

## SKILLS

---

**Software & Tools** — AutoCAD , Revit , SAFE , Primavera P6 , MS Excel , MS Word , PowerPoint

**Quantity Surveying** — BOQ Preparation | Quantity Takeoff | Measurement Sheets

**Planning & Control** — Scheduling | Time Control | Progress Tracking (Primavera P6)

**Cost & Reporting** — Cost Tracking (Excel) | Technical Documentation | Presentations

## PROJECTS

---

### **Project Management Plan for High-Speed Railway Station**

*Graduation Project (Project Management) | Grade: A | Sep 2018 – Jun 2023 Integrated Project Controls Plan for a High-Speed Railway Station (October Gardens, Fayoum Road)*

- Developed a complete project management plan covering scope definition, WBS, and construction sequencing.
- Produced detailed time and cost estimates, BOQ calculations, and quantity-based budget planning.
- Built a full baseline schedule in **Primavera P6**, including activities, logic ties, milestones, and resource/time loading.
- Performed risk identification and analysis, with mitigation actions and contingency planning to protect schedule and budget.
- Conducted contract and claims analysis, supporting procurement strategy and contract administration decisions.
- Applied time and cost control techniques (earned value / progress measurement) to track performance and recommend corrective actions.
