PROFESSIONAL SUMMARY

With a dynamic and enthusiastic spirit, I aspire to be part of a team that contributes to building a better future through continuous innovation and development. As a Computer Engineer and Cybersecurity specialist with extensive experience in electricity and information technology, these academic and practical components have given me a comprehensive view of the importance of technology, data governance, and cybersecurity in building nations, organizations, and entities with different orientations. We live in a different world that deserves to be built better by harnessing machines and science. Therefore, I always work towards achieving goals in the best possible ways. I have a forward-looking vision to achieve excellence in every project I participate in, and I constantly strive to develop my skills and apply the latest technologies to ensure the best solutions. I enjoy the journey of development and construction, learning along the way.
