Personal information

- Date of birth: 26/8/2000
- Graduation: February 2024
- Egyptian
- Saudi Council of Engineers Membership ID : 1119300

Profile Summary

Civil Engineer with practical experience in site execution, finishing work and general site supervision, alongside a solid foundation in project planning and infrastructure work. I hold a bachelor's degree from Ahrum Canadian University (ACU), with a focus on road and bridge design, transportation systems, and resource coordination.

Through early involvement in real project environments, I gained valuable exposure to teamwork, organization, and communication balancing site responsibilities with planning tasks. I'm always seeking to grow, contribute, and add meaningful value to my career path.

In my final year I led a graduation project combining Highway & Transportation Design with Project Management an experience that strengthened my ability to connect the technical and administrative sides of work.

I'm eager to continue learning, take on real world challenges and grow as a well-rounded civil engineer who understands both the execution and the planning side of the job.

Skills

- Effective Communication skill.
- Forecasting and planning .
- Site Supervision & Execution Leadership experience.
- Time Management & Organization .
- Microsoft Office .
- Collaboration talent.
- Adaptability & Learning.
- Decision making.
- Teamworker .
- Technical Skills.
- Leadership experience.
- Detail-Oriented .
- Technical Reports.
- Project management .
