PROFESSIONAL SUMMARY

Senior Site Engineer with 7+ years of experience delivering residential, commercial, and public-sector projects. Strong background across construction and finishing works, site leadership, multi-discipline coordination, shop drawing review/approval, and compliance with approved drawings, project specifications, and the Saudi Building Code. Hands-on experience in QA/QC and technical office deliverables.

CORE SKILLS

- Supervision and management of construction site activities in accordance with project specifications, Saudi building codes, and approved schedules.
- Preparation, review, and approval of Shop Drawings in line with project and consultant requirements.
- Method statements review and ensuring workmanship quality on site.
- Coordination with owner, consultants, subcontractors, and site teams.
- Technical problem-solving and on-site issue resolution to avoid delays and cost overruns.
- Ability to work under pressure and manage multiple tasks efficiently.
- Coordination between structural/architectural works and MEP works.
- Strict adherence to Health, Safety & Environment (HSE) requirements.
- Proficient in computer applications and engineering software.
