Address: Kingdom of Saudi Arabia | **Date of Birth:** 16 August 1981

Objective

Dedicated and results-oriented Site Engineer with strong experience in supervising construction sites, leading teams, and coordinating multi-disciplinary works including civil, finishing, electrical, and plumbing activities. Adept at managing site operations, meeting deadlines, and maintaining high quality standards. Looking to contribute my leadership, project management skills, and hands-on engineering expertise to a reputable company.

Work Experience

Site Engineer at MARX Construction | Sep 2021 – Oct 2025

- Supervised daily site activities to ensure work progress aligned with approved drawings, specifications, and project timelines
- Provided technical support and guidance to subcontractors and site teams during construction and finishing stages
- Conducted inspection and quality control checks to ensure compliance with engineering and safety standards
- Prepared daily and weekly progress reports and submitted updates to the project manager and stakeholders
- Ensured full HSE compliance by enforcing safety rules, conducting toolbox talks, and minimizing onsite hazards
- Assisted in risk identification, mitigation planning, and problem resolution to avoid delays or rework
- Coordinated with consultants, suppliers, and contractors to ensure timely availability of materials and accurate execution of work

Team leader at EBSSA Research Center | For Five Years

- Led and supervised a team of researchers and data collectors
- Reviewed research methodologies, survey tools, and final reports
- Ensured data accuracy, credibility, and high-quality outputs
- Coordinated tasks and timelines to meet project deadlines
- Improved data accuracy and report quality by implementing organized work procedures
- Played a key role in enhancing research output through strong methodological knowledge
- Successfully delivered multiple research projects for clients across different sectors

Freelance Projects (Contractor)

Projects: Al-Sheikh Salih Al-Kamil Farm & Villa, Residential Villas & Buildings

- Managed end-to-end contracting and site supervision for private projects
- Coordinated with workers, subcontractors, and suppliers
- Oversaw structural and finishing works, ensuring high-quality standards

- Delivered projects on time and within budget
- Earned client trust, resulting in repeated project requests and referrals

Site Engineer at Otas Engineering Design Co. | Jan 2015 – Aug 2018

- Supervised daily site activities for construction projects
- Managed finishing, plumbing, and electrical works
- Coordinated with consultants, contractors, and suppliers
- Ensured compliance with safety standards and project specifications
- Improved site workflow by monitoring productivity and solving on-site challenges
- Ensured high-quality finishing work that met client expectations

Site Engineer at Mohammed Siraj Engineering Co. (Consultancy) | 2013 – 2015

- Supervised construction activities as a consultant representing the client
- Ensured contractor compliance with approved drawings and specifications
- Prepared site reports and participated in project inspection and handover
- Successfully guided project execution to meet consultancy standards
- Enhanced quality control and reduced rework on-site

Site Engineer at Shahd Engineering | Nov 2011 – May 2013

Major Projects: Governor's Villa (Kassala), 7 Minister Villas, State Commercial Market, Hotel Project

- Supervised construction works for high-profile residential and commercial projects
- Followed up on site progress and coordinated with subcontractors
- Ensured that finishing, MEP, and civil works met project requirements
- Contributed to the successful delivery of multiple landmark projects in Kassala State
- Maintained quality and consistency across several simultaneous villa projects

Site Engineer at E.Gate for Development Co.Ltd | 2008 – 2011

Projects: Kafori Tower, Residential Villas

- Managed project execution on-site, including structural and architectural stages
- Supervised labor teams and monitored materials and equipment usage
- Played a key role in delivering multi-story and residential projects with quality results

Site Engineer at Abubakr Engineering Consultants | Jan 2007 – Jan 2008

- Conducted site inspections and ensured work followed design specifications
- Prepared daily progress reports and communicated project updates to management

Site Engineer at Alwateen Investment & Contracting Co. | 2004 – 2007

Projects: Adil Yousif Alashi Residence – Kafori | Tarig Mohi Al-Deen Al-Jamiai Residence – Kafori

- Supervised villa construction from foundation to finishing
- Coordinated manpower and materials to maintain progress and quality
- Successfully delivered luxury residential projects with high finishing standards

Site Engineer at Middle East Co.

Project: Greater Nile Headquarters

- Assisted in site supervision and technical coordination for a major headquarters project
