

# RAGAAY MANSOUR MAHMOUD IBRAHIM REHAB

Certified Engineering Project Manager | +15 Years of Experience in Managing Projects

---

## PERSONAL DETAILS

Madinah, Kingdom of Saudi Arabia  
Email | ragaey1988@gmail.com  
Phone number: +966575761942 | +966509801026

## PROFILE

Professional Civil Engineer holding PMP certification, specialized in project management and consultancy supervision for major construction projects with over fifteen years of experience in the Saudi market. Proven track record in leading and delivering diverse projects worth millions of Riyals for the Ministry of Housing, Municipalities, and Amanah, achieving high completion rates with strict adherence to schedules and budgets. Combines deep executive experience with specialized consultancy supervision, with comprehensive expertise in contract and payment management and government electronic platforms. Seasoned team leader capable of managing multi-disciplinary projects and solving complex problems with exceptional efficiency, with steadfast commitment to applying quality and safety standards according to Saudi Code and international specifications. Seeks to contribute to leading and developing major strategic projects with high professionalism and achieving distinguished results through the deployment of experience and skills effectively. Adhering to best engineering practices and distinguished professional performance with commitment to sustainable added value creation.

## EDUCATION

**Bachelor of Civil Engineering** Jun 2010  
Faculty of Engineering, Kafr El-Sheikh University, Egypt  
Grade: Very Good with Honors

## EMPLOYMENT

**Senior Civil Engineer** Jun 2023 - Present  
Al-Mutamayezoon Engineering Consultancy Office – Madinah Projects Agency

### Responsibilities:

- Comprehensive supervision of road humanization works implementation and ensuring compliance with approved plans, technical specifications, and Saudi Code through regular field visits and precise monitoring of all implementation phases.
- Reviewing and approving executive plans and verifying their integration with all engineering disciplines and coordinating with consultants and contractors to resolve any conflicts before starting implementation to avoid delays and additional costs.
- Managing the technical acceptance process for executed works and verifying their compliance with quantity schedules and specifications through conducting necessary inspections and tests and issuing detailed acceptance reports.
- Monitoring daily and weekly progress of works and comparing them with the approved time program and taking immediate corrective actions to address any deviations and coordinating with all parties to ensure smooth workflow.
- Reviewing and auditing financial payments submitted by contractors including verifying the accuracy of executed quantities, matching prices to contract items, and approving test results and materials before final approval from the owner entity.

## Consulting Project Manager

Dec 2022 – Aug 2023

Hani Mohammed Aseeri Engineering Consultancy Office, Yanbu

### Responsibilities:

- Managing all technical and administrative aspects of the project in a consultancy capacity including planning, organizing, and control, ensuring achievement of project objectives within specified standards for time, cost, and quality.
- Preparing comprehensive periodic reports clarifying project progress status, achieved accomplishments, technical problems, and proposed solutions and submitting them to concerned entities for taking appropriate decisions at the right time.
- Leading and coordinating between multi-disciplinary engineering teams and ensuring technical integration between civil, architectural, electrical, and mechanical works and resolving any conflicts that may arise during implementation.
- Analyzing and reviewing time programs submitted by contractors and verifying their realism and monitoring achievement of targeted percentages and preparing detailed reports on reasons for any delay and proposing work acceleration plans when needed.
- Reviewing and approving financial payments and new items after comprehensive audit of quantities and prices and verifying fulfillment of all technical and financial requirements before submission for final approval from the Ministry of Housing.

## Structural Supervision Engineer

Jun 2019 – Dec 2022

Hani Mohammed Aseeri Engineering Consultancy Office, Yanbu

### Responsibilities:

- Direct supervision of structural works implementation for the residential project and ensuring compliance with approved executive plans and technical specifications through continuous field monitoring and precise technical inspections.
- Reviewing and approving structural materials used in the project and verifying their compliance with approved specifications in coordination with materials engineer and accredited laboratories and issuing approval reports for compliant materials.
- Reviewing soil testing and borehole reports and ensuring foundation implementation according to recommendations contained therein and coordinating with design consulting office when needed for any modifications in the structural system.
- Accepting executed structural works in all their stages through detailed inspections and verifying dimensions, levels, and execution quality and issuing acceptance minutes and correction requests when violations exist.
- Monitoring compliance with approved time schedule and preparing periodic reports on actual completion percentages and coordinating with contractor to address any delay and submitting necessary recommendations to accelerate work when necessary.

## Executive Project Manager

Nov 2012 – Apr 2019

Saqr Salem Al-Azmi General Contracting Corporation, Mecca

### Responsibilities:

- Managing, planning, and organizing all project activities from preparation and setup stage until final delivery including coordinating human and material resources and ensuring their availability at the right time to achieve project objectives.
- Direct supervision of excavation, leveling, and replacement layers implementation according to geotechnical report and supervising concrete works implementation for foundations and structural frame and ensuring their compliance with plans and specifications.
- Preparing comprehensive project quantity survey and reviewing architectural and structural plans to ensure no conflicts exist and coordinating with consulting office to solve any technical problems before and during implementation.
- Coordinating with subcontractors and suppliers to ensure works execution and materials supply according to specifications and specified time schedules and monitoring their performance and ensuring their commitment to quality and safety standards.
- Preparing and submitting financial payments on electronic platforms for Riyadh Region Amanah and following up on their approval and coordinating with financial and technical departments to resolve any observations or inquiries.

## Executive Project Manager

2017 – 2018

Saqr Salem Al-Azmi General Contracting Corporation, Afif

### Responsibilities:

- Managing implementation of public squares development project including planning, organizing, and supervising all civil works, finishing works, and site coordination to achieve aesthetic and functional objectives of the project.
- Supervising infrastructure works implementation including underground tanks, irrigation and drainage networks, and ensuring their implementation according to approved plans and technical specifications.
- Monitoring implementation of site coordination works, median islands, and architectural elements and coordinating with architectural engineers to ensure achieving required final shape according to approved design.
- Managing human resources and equipment at site and distributing tasks to technical teams and monitoring their implementation and ensuring compliance with occupational health and safety standards in all work phases.
- Coordinating with owner entity to accept executed works and preparing necessary documents for preliminary and final delivery and monitoring maintenance works during warranty period until final delivery.

### **Executive Project Manager**

2016 - 2017

Saqr Salem Al-Azmi General Contracting Corporation, Ruwaidah

#### **Responsibilities:**

- Managing metal bridge construction project and supervising all implementation phases from civil works until metal sections installation and ensuring work integration between different engineering disciplines.
- Reviewing modified structural plans and detailed shop drawings and coordinating with consulting office and technical office to ensure design accuracy and its implementability according to approved specifications.
- Preparing detailed quantity survey for all contract items and calculating differences between contractual quantities and actual quantities and preparing financial transactions for new items and coordinating with owner entity for their approval.
- Supervising concrete works implementation for foundations, columns, and stairs and ensuring their compliance with plans and monitoring necessary tests and accepting works from consulting office.
- Coordinating with manufacturing company for metal sections and monitoring manufacturing, transportation, and installation works at site and ensuring their compliance with technical specifications and structural safety requirements.

### **Executive Project Manager**

2015 - 2016

Saqr Salem Al-Azmi General Contracting Corporation, Dawadmi

#### **Responsibilities:**

- Managing box culverts construction project for rainwater drainage and supervising all technical and administrative works ensuring project implementation according to plans, specifications, and approved time schedule.
- Reviewing surveying works for valley paths and coordinating with surveyors and consulting office to determine optimal locations for culverts and ensuring adequacy of their dimensions for discharging expected flows.
- Reviewing and approving executive shop drawings with actual dimensions and coordinating with consulting office to approve any required modifications based on actual conditions at site.
- Coordinating and managing specialized subcontractors in excavation, backfilling, carpentry, reinforcement, and concrete works and ensuring their commitment to technical specifications, time schedules, and quality and safety standards.
- Preparing financial payments and preparing required documents for acceptance and coordinating with municipality and consulting office to conduct preliminary and final acceptance operations according to approved procedures.

### **Site Executive Manager**

2014 - 2015

Saqr Salem Al-Azmi General Contracting Corporation, Dawadmi

#### **Responsibilities:**

- Managing retaining walls construction project to protect villages from floods and supervising all implementation phases from preparatory works until final delivery ensuring achievement of project technical objectives.
- Reviewing hydrological and surveying studies and coordinating with consulting office to determine locations and heights of retaining walls ensuring effective protection of villages from flood hazards.
- Supervising excavation, foundations, and reinforced concrete works implementation for retaining walls and ensuring their implementation according to technical specifications and monitoring necessary tests to ensure quality.
- Managing and coordinating work between different subcontractors and ensuring availability of necessary materials and equipment at the right time and monitoring compliance with health and safety standards at site.
- Preparing periodic reports on work progress and submitting financial payments and coordinating with municipality to conduct acceptance operations and monitoring maintenance works during warranty period until final delivery.

### **engineer Site engineer and technical office**

2013 - 2014

Ministry of Islamic Affairs, Endowments, Da'wah and Guidance, Taif

#### **Responsibilities:**

- Managing mosque demolition and reconstruction project and supervising all phases from demolition works until final finishes and coordinating with owner entity to ensure achievement of religious and technical requirements.
- Preparing modified architectural plans based on actual dimensions of site after discovering non-compliance of original plans and coordinating with owner entity to approve new design.
- Supervising implementation of all structural, architectural, electrical, and mechanical works and ensuring their compliance with specifications, mosque requirements, and approved quality standards.
- Coordinating with suppliers of finishing materials, electrical works, and air conditioning to ensure supply of materials compliant with specifications and on specified dates without affecting project time schedule.
- Preparing detailed quantity survey and submitting financial payments throughout project period and coordinating with owner entity to accept works and issue final completion certificate.

**Responsibilities:**

- Managing and supervising implementation of cemetery fencing construction project in multiple locations in Taif Governorate and its villages and ensuring works implementation according to approved plans and technical specifications.
- Monitoring civil, structural, and finishing works implementation and ensuring execution quality and compliance with specifications through regular field visits and technical inspections.
- Coordinating with suppliers to supply structural materials, finishing materials, and electrical works according to approved specifications and on specified dates to avoid affecting workflow.
- Preparing detailed survey of executed quantities and submitting periodic and final financial payments according to financial procedures approved by Amanah.
- Coordinating with Amanah to conduct preliminary acceptance operations and supervising maintenance works during warranty period until final delivery and receiving project completion certificate.

**Supervision Engineer for Implementation Works**

Oct 2010 – Nov 2012

General Administration of Engineering Affairs at Kafr El-Sheikh University, Egypt

**Responsibilities:**

- Supervising civil and structural works implementation in different university buildings and ensuring their compliance with approved plans and technical specifications through continuous field monitoring.
- Monitoring contractors' compliance with specified time schedules and coordinating with them to solve any technical or administrative problems that may affect workflow and preparing periodic reports on progress status.
- Reviewing and approving materials used in implementation and ensuring their compliance with technical specifications through examining certificates of conformity and laboratory test results.
- Coordinating with contractors and consultants to solve technical problems that appear during implementation and making appropriate decisions in coordination with senior management.
- Preparing periodic technical reports on projects status clarifying progress achieved, problems, and proposed solutions and submitting them to senior management for making appropriate decisions.

## COURSES

Professional Project Management Certificate (PMP)

Green Project Manager Professional Certificate (GPM-B)

Certified Quality Engineer Certificate (ESQE)

Advanced AutoCAD Course

SAP2000 Program for Structural Analysis Course

International Computer Driving License (ICDL)

## ACHIEVEMENTS

- Effective leadership of multi-disciplinary team to solve engineering conflicts and coordinate between consultants and contractors to achieve smooth workflow.
- Managing effective coordination between different engineering teams to ensure technical designs compatibility and reduce technical disputes during implementation phases.
- Managing technical acceptance plan for executed works and ensuring their compliance with specifications through accurate reports and field inspections, which enhanced trust among all parties.

## PERSONAL SKILLS

Leadership and Team Management

Effective Communication

Problem Solving and Decision Making

Time and Priority Management

Working Under Pressure

## SOFTWARE SKILLS

AutoCAD

SAP2000

Microsoft Office Suite

Project Management Software

Government Electronic Platforms

## CAREER SKILLS

- **Comprehensive Construction Project Management:** In-depth experience in project management from planning and preparation phase until final delivery ensuring achievement of specified objectives for time, cost, and quality and managing all human and material resources with high efficiency.
- **Specialized Consultancy Supervision:** Ability to provide comprehensive technical supervision on government and private projects implementation and monitoring works quality and ensuring their compliance with Saudi and international specifications and standards and issuing detailed technical reports.
- **Contract and Financial Payment Management:** Extensive experience in preparing, reviewing, and approving financial payments and managing modifications and new items in contracts and calculating financial differences and negotiating with contractors and suppliers according to contract terms.
- **Review and Approval of Engineering Plans:** Advanced skill in reviewing architectural, structural, and electromechanical plans and discovering technical conflicts before implementation phase and coordinating with consulting offices to solve them and ensuring plans readiness for implementation.
- **Quality Assurance and Standards Compliance:** Strict commitment to applying quality and safety standards in all project phases according to Saudi Code and international specifications and monitoring necessary tests and ensuring obtaining required approvals.
