DETAILED WORK EXPERIENCE

Civil Supervisor - Advanced Construction for Contracting Co. (ADCO)

(08/2025 - Present)

Key Tasks

- Supervise demolition, structural repair, and renovations in mosque areas, ensuring safety in an active airport environment.
- Coordinate daily subcontractor activities and airport teams, maintaining access control and minimising disruptions.
- Review drawings and specifications to guide accurate implementation of architectural, civil, and finishing works.
- Conduct daily HSE toolbox talks and enforce airport safety protocols, ensuring GACA and security compliance.
- Monitor material deliveries, maintain progress records, and report site status to project management for timely decision-making.

Civil Supervisor - Astra construction company

(07/2023 - 04/2025)

Key Tasks

- Supervised structural, civil, and finishing works on a high-end hospitality development, ensuring compliance with design and quality standards.
- Monitored subcontractor performance and site execution, maintaining schedule adherence and resolving on-site issues to meet project milestones.
- Conducted daily HSE and quality inspections in line with Red Sea Development guidelines, coordinating with QA/QC for material and method-statement approvals.
- Managed PTW processes and coordinated logistics, inventory, and site resources to enable uninterrupted construction activities.
- Engaged with consultants during walkdowns and design coordination meetings, ensuring seamless communication between planning, engineering, and execution teams.

Civil Supervisor / Civil Foreman - Alfanar Construction KSA

(11/2013 - 04/2018)

Key Tasks

- Supervised complete substation civil works, including duct banks, trenches, and transformer foundations, ensuring proper execution and alignment with project specifications.
- Ensured SEC compliance, quality control, and safety through daily toolbox sessions.
- Coordinated closely with the planning team to manage manpower, equipment allocation, and task scheduling, ensuring the timely completion of daily activities.
- Verified shop drawings and implemented accurate civil/electrical ducting alignment, while facilitating snag list closure and supporting final SEC inspection readiness.
