PROJECTS

132kV Grid Substation Project

Executed on-site construction and safety oversight for a 132kV substation.

- Conducted daily safety inspections, toolbox talks, and ensured strict compliance with Lockout-Tagout (LOTO) and PPE protocols.
- Contributed to a zero-incident safety record by proactively identifying and mitigating hazards.

Nakshi Homes Ltd.

Directed safety oversight ensuring full compliance with company safety standards.

- Performed daily site inspections and risk assessments, effectively identifying and mitigating potential hazards.
- Collaborated with site management to enforce PPE use and safe work practices, maintaining an excellent safety record.
