---

Civil Engineer with 3 years of experience in road works, including design, technical office, and site execution. Well-versed in engineering standards and technical specifications, with hands-on experience in preparing shop drawings, quantity surveying, and cost estimation, as well as on-site supervision to ensure quality and adherence to project timelines. Also experienced in landscape works, including planning and executing green spaces and gardens, selecting appropriate materials, and coordinating with other disciplines to ensure design harmony and project integration. Highly capable of working within multidisciplinary teams and committed to delivering high-quality outcomes on schedule
