PROFILE SYNOPSIS

An OHSE professional with an Engineering Geology and HSE academic background with over 19 years of promising work experience on complex & diverse projects. My professional career encompasses multimillion-dollar construction projects well suited to the construction and infrastructure boom in Kingdom of Saudi Arabia. My current and past projects included high-rise buildings, utility infrastructure, mixed-use facilities, major, mega housing & major infrastructure projects, oil & gas exploration, and construction of pharmaceutical units.

I am confident that this experience coupled with my internal focus will enable me to add value to any organization and its operational regime.

PROFESSIONAL SKILLS & CAPABILITIES

- HSE Compliance & Assurance
- Integrated Management System
- Management System Audits
- Project Feasibility & Scoping
- Emergency Response Management
- Contractor & People Management
- Construction Engineering & Safety
- System Integration
- Process Improvements
- Change Management
- Risk Management
- Project Management
- Stakeholder Management
- Sustainable Development
- Accident & Injury Management
- HSE Coaching & Training
- Safe System of Work
- Safety in Design
- Documentation & Reporting

CAREER ACHIEVEMENTS

- Achieved **40 million man hours** without **lost time accidents (LTA)** in **Jabal Omar Development Project Phase II Makkah, Kingdom of Saudi Arabia**.
- **Safe Erection & Dismantling of tower cranes** in **Jabal Omar Development Project Phase II** from the top of the towers with the help of **1200 ton** mobile crane on **Ibrahim Khalil Road, Makkah, Kingdom of Saudi Arabia**.
- Design, Development & Implementation of **Integrated Waste Management System** at **Bhit & Bhadra Gas Fields Eni Pakistan Limited Sindh, Pakistan**.
- Design, Development & Implementation of **Waste Management System** at **Pfizer Pakistan Limited (SITE, West Wharf and Wyeth Facility) Sindh, Pakistan**.
- Design and development of **Emergency Response Plan** for **Spill Control** of **BHP Billiton Zamzama Gas Plant Sindh, Pakistan**.
- Dismantling and erection of **Zamil steel structure** from **GSK Pakistan** formerly **Beecham Pakistan (Pvt) Ltd. Sindh, Pakistan**.
- Achieved **10 million man hours** without **lost time accidents (LTA)** on the Completion of the project (New Lactum Building) and New Plant Room **GSK Sindh, Pakistan**.

EDUCATION & PROFESSIONAL DEVELOPMENT

- **Masters of Engineering Geology – University of Karachi** **2004**
- **Bachelors of Geology – University of Karachi** **2001**
- **OTHM Level 6 Diploma in Occupational Health and Safety** **2025**
- **NEBOSH International General Certificate – NEBOSH UK** **2009**
- **Lead Auditor ISO 45001:2018 , ISO 14001:2015 and ISO 9001:2015 Exemplar Global** **2025**
- **ASP® Associate Safety Professional in Progress from BCSP**
- **PMI- RMP in Progress**
- Process Safety Management from ENSR Malaysia
- OHSAS 18001 & Its Applications from URS Pakistan
- Accident incident investigation techniques from PSTD Pakistan
- Solid Waste Management conducted by Municipal Training and Research Institute (MTRI) Karachi
- First Aid conducted by St. Johns Ambulance Institute Karachi
- Fire Fighting by Fire Protection Association of Pakistan (FPAP)
- Safety Leadership
- Safety Management System
- Rigging, Lifting & Working at Heights
- Team Building
- Beyond Safety (Safety Values)

CAREER SNAPSHOT

EMPLOYER	POSITION	DURATION
<i>SA BAYTUR CONSTRUCTION COMPANY</i>	HSE Manager	Aug 2015 – Present
<i>SA BAYTUR CONSTRUCTION COMPANY</i>	Senior HSE Engineer	Aug 2014 – Aug 2015
<i>EMC PRIVATE LIMITED</i>	Manager Operations HSE	May 2013 – Aug 2014
<i>GLAXO SMITH KLINE GSK PAKISTAN</i>	Construction Safety & Training Consultant	Aug 2012 – May 2013
<i>BRITISH PETROLEUM BP PAKISTAN</i>	Seismic HSE Advisor	July 2011 – Aug 2012
<i>EMC PRIVATE LIMITED</i>	HSE Engineer	Aug 2007 – July 2011
<i>EMC PRIVATE LIMITED</i>	Field Operations In charge	Mar 2004 – Aug 2007

CAREER SUMMARY, EXPERTISE & KEY ACCOUNTABILITIES

Worked for leading engineering, construction, pharmaceutical and oil and gas exploration & production organizations. I held various levels of professional roles to execute work as an HSE compliance, strategies, management and planning professional. In my professional span of life, I had an opportunity to work for different types of organizational scopes and structures that include but are not limited to; major infrastructure, pharmaceutical units, processing units, plants, mixed-use development facilities, high-rise structures, etc. This extensive exposure enabled me to successfully build the trust levels of my peers.

During my 18 years of experience being accountable for my roles, I diligently worked on following key elements and fulfilled assigned responsibilities.

Policy, Strategy, & Systems

- Managed and set a pathway toward initiatives.
- Developed and implemented organizational policies, programs, and initiatives for continuous improvement around H&S risk management and visible safety leadership.
- Actively worked with project teams and other business units to ensure HSE systems and processes are reflective of the departmental risk profile of the project/business, are fit for purpose, are continuously improved, and are appropriately applied to adhere to the compliance requirements.
- Ensure that HSE information is captured within the organization's HSEQ database(s) against system requirements, provided, and/or training and coaching as required.
- Identified and supported the development and implementation of processes, tools, and templates aimed at improving the efficacy and relevancy of HSE considerations within the project.
- Provided support, coordination, and advice on HSE practices, systems, and procedures within multiple defined workplaces and operations located in Saudi Arabia.
- Reviewed and revised technical documentation associated with projects i.e., Plans, SWMS, SOPs, SWIs, and risk assessments

Performance Measurement & Monitoring

- Represented the company during the management system audits, surveillance, and re-certification audits.
- **Establishment & Implementation of ISO 45001 through leadership & management commitment, establishing an Implementation team, conducting gap analysis, Implementation of development plan, risk assessment & engineering controls, training & awareness, Internal audits with management reviews and navigate the process of establishing a robust OH&S management system that aligns with ISO 45001 requirements.**
- Conducted HSE audits and inspections to assist in the development of recommendations for tailored programs to improve HSE performance.
- Contribute to the implementation and monitoring of critical controls
- Support the development of reporting, monitoring, measurements, and evaluation tools and local HSEQ performance rhythms schedules.
- Reviewed main & sub contractors' competency and HSE performance at the planning and development stage.

Compliance & Reporting

- Support the design and implementation of relevant compliance measures, systems, and processes to assist teams with achieving their HSE performance measures.
- Provide insight and support to ensure the timely completion of HSE compliance reporting, HSE results and performance with recommendations for improvement across all levels of the businesses.
- Led and supported the management of incidents and risks to ensure they are appropriately captured, managed, and reported.
- Support to ensure timely regulatory reporting that may be required from various legislative and license obligations.
- Assist in the maintenance and improvement of HSE risk processes, tools, and templates as defined by the HSE Management Systems.
- Overseeing the development and implementation of the HSEMS assurance program by planning, leading and managing the HSE audit, inspections, and reviews to ensure HSE standards are upheld and continuously improved protocol and program.

Industrial & Legislative Support

- Liaise and develop sound working relationships with (key) internal and external stakeholders, such as Civil Defense and MOH.
- Provide effective and timely advice to stakeholders about HSE strategy and systems to assist with legislative obligations as relevant to areas of influence and accountability.
- Facilitate and ensure that employees are aware of their responsibilities regarding the respective Health and Safety legislation and the HSE framework.
- **Implementation of core values of ISO 45001 with respect to legal frame work in compliance with obligatory requirement set forth by applicable legal laws.**

Consultation, Awareness, Investigations, & HSE Advice

- Built and fostered strong collaborative relationships with internal stakeholders.
- Coached and influenced leaders to co-create pragmatic solutions, drive change, and maintain a strong, positive, resilient safety culture.
- Supported the development and delivery of HSE initiatives/programs/training for the project in line with the Organizational HSE Strategy.
- Supported the business with regulatory requirements and interfaces.
- Participated in developing and reviewing HSE Management Plans and Risk workshops.
- Supported HSE engagement structures (committees or otherwise) that facilitate the opportunity for those in their area of influence to engage with HSE issues and subsequently consulted for actions.

shariqsher@yahoo.com

- Led complex HSE investigations and support the business with less-complex HSE investigations, to find causes and outline mitigation strategies to prevent re-occurrence, which may include liaison with regulatory officials.

Environmental Management & Compliance

- Successfully implemented an integrated waste management system for petrochemical industrial units.
- Supported in the compilation of Environmental Impact Analysis (EIA) & Initial Environmental Evaluation (IEE) reports, and environmental risk assessment (ERA) of projects for various clients.
- Ensure implementation of and adherence to project HSE and CEMP plans through effective monitoring, audits, corrective actions, and implementation of environmental management principles.
